Where the puck heads, the opportunities await!

I. Message to our shareholders

Chairperson
Susan S. Chang

Taiwan Financial Holdings (TFH) had a vigorous first year in operation after the company was formally established at the beginning of 2008. After the Bank of Taiwan became our principal subsidiary in a share swap deal, it spun off its insurance and securities operations in capital reduction deals that resulted in two more subsidiaries for TFH, which now ranks as Taiwan's largest state-run financial holding company with assets of NT\$3.8 trillion. The birth of TFH represents a milestone in the forward march of Taiwan's financial industry. The company has been launched at a crucial time, with the world economy in the midst of great flux. Our goal is to be Taiwan's flagship financial holding company, and to develop the superior quality and stability that will enable us to act as a guiding force in Taiwan's financial industry in support of the government's financial policy, so as to stabilize our financial markets, help our industries upgrade, and strengthen the national economy. Anchored by our banking subsidiary, and relying on our holding company platform, we intend to take advantage of our integrated resources and cross-selling capabilities to bolster our strength and competitiveness, so that TFH can shoulder the mission that befalls us - and the advantages that we enjoy - as a large financial holding company. Our task is to lead Taiwan's financial industry forward, and take it onto the international financial stage.

We have witnessed tremendous upheaval in the global economy and financial markets in the past year. The implosion of Fannie Mae and Freddie Mac, and the bankruptcy of Lehman Brothers, set off a chain-reaction financial crisis that has since expanded into a global economic crisis, triggering a contraction of unforeseen speed and scope. Taiwan's economy has been gravely affected, and many complex variables in the economy, and especially the financial sector, make it difficult to be sure exactly what we can expect going forward. To weather the storm, TFH has adopted a pragmatic growth strategy, concentrating on running the business with professionalism and expanding on our core competencies. We have sought to run our business with professionalism, and expand on our core competencies. In 2008, this strategy resulted in net profit after tax of NT\$7.1 billion, fifth highest among Taiwan's 15 financial holding companies. Among our subsidiaries, the Bank of Taiwan actively accommodated government policy by providing concessionary loans to individuals and businesses, and the FSC ranked the Bank of Taiwan No. 1 among domestic banks for loans to small and medium enterprises for the period of July 2007 to June 2008. BankTaiwan Life Insurance (BTLI) ranked 4th, 5th, and 3rd for first-year premiums, continued premiums, and gross premiums respectively in 2008, thanks in no small part to its cross-selling capabilities as a TFH subsidiary, while BankTaiwan Securities (BTS) received NT\$77.8 billion in trading orders in 2008, many of which came in thanks to referrals from the group's banking channel. TFH is thus beginning to capitalize on group synergies and to achieve its growth potential. In this report we will set out the 2008 operating results of TFH and each of its subsidiaries, their 2009 business plans, and their development strategies for the future.

1. 2008 operating results

(1) Corporate restructuring

TFH was established by the Bank of Taiwan in a share swap on 1st January 2008 in accordance with the provisions of the Financial Holding Company Act, the Company Act, and other applicable laws and regulations. With authorized capital of NT\$90 billion, the company is Taiwan's first wholly state owned financial holding company. Then on the following day (2nd January), the Bank of Taiwan spun off its securities and insurance operations to form two separate TFH subsidiaries - BTS and BTLI - and became Taiwan's 15th financial holding company, with three wholly owned subsidiaries in banking, securities, and life insurance.

The Bank of Taiwan, TFH's principal subsidiary, was established on 20th May 1946 with capital contributed by the National Treasury Agency. On 1st July 2003 it was reorganized as a company limited by shares, and on 16th September 2004 became a public company. Thereafter, in order to coordinate with the government's financial reform policies, the bank on 1st July 2007 merged with Central Trust of China. As of the end of March 2009, the bank held 12.66% of all deposits in Taiwan

President
Tse-Cheng Lo

and accounted for 10.63% of loans, tops among domestic commercial banks on both counts, and with assets of US\$103.2 billion stood at No. 29 in Asia and No. 133 in the world on a list of the world's largest 1,000 banks published in the July 2008 issue of The Banker magazine.

(2) Business plan and strategy

(i) TFH

2008 was our first year in business, and featured the following successes:

- We crafted a carefully conceived business strategy, and adopted a roadmap and a basic strategy. These constitute a program of action that will provide the basis for efforts by TFH to develop into a top-flight financial holding company.
- To foster a strong cadre of financial holding company managerial talent, we sent observation teams overseas to world-leading financial holding companies to study advanced management techniques - including channel marketing, risk management systems, and IT systems.
- We established a target management system for subsidiaries, and monitored its implementation on a monthly basis. Through systematic oversight and management, the TFH group in its very first year was able to exceed targets for deposits, loans, foreign exchange business, and life insurance business. The group ranked the 5th in the industry for profitability.

(d) We set up a universal banking arrangement covering our banking, life insurance, and securities businesses to improve cross-selling results, product integration, and customer services, so as to increase the penetration rate of group products.

(e) We integrated group resources, introduced new IT systems and financial products, and adopted a platform for shared access to financial laws and regulations as well as research. This will lower our operating costs and enable us to reap the benefits of group synergy.

(ii) Bank of Taiwan

The Bank of Taiwan held deposits of NT\$2,687,630 million, had outstanding loans of NT\$1,970,042 million, and its foreign exchange business amounted to US\$261,314 million. The non-performing loan (NPL) ratio stood at 1.06%, the NPL coverage ratio was 54.84%, and the BIS ratio was 11.63%.

(iii) BankTaiwan Life Insurance

At BTLI, first-year premium income came to NT\$37,032 million, continued premium income was NT\$12,535 million, gross premium income was NT\$49,567 million, the NPL ratio was 0.54%, the NPL coverage ratio was 245.35%, and the RBC ratio was 147.66%.

(iv) BankTaiwan Securities

At BTS, securities brokerage volume came to NT\$414,021 million, average outstanding margin positions stood at NT\$1,356 million, and the BIS ratio was 1,503%.

(3) Budget

1. Budgeted and actual figures for 2008 (TFH):

Unit: NT\$1,000

Item	Actual	Budgeted	Budget achievement rate (%)
Net revenues	60,911,116	68,255,393	89.24
Expenses and losses	53,914,330	59,255,393	90.99
EBT from continuing operations	6,996,786	9,000,000	77.74
Net earnings	7,123,945	8,412,553	84.68
Earnings per share (NT\$)	0.79	0.93	84.95

Note: Profitability fell short of the forecast due to the financial crisis, which forced TFH subsidiaries to write down asset values by NT\$4.718 billion.

2. Budgeted and actual figures for 2008 (TFH subsidiaries)

Unit: NT\$1,000

Subsidiary	Net earnings	Budgeted net earnings	Budget achievement rate (%)
Bank of Taiwan	8,152,201	7,947,664	102.57
BTS	-63,265	70,790	—
BTLI	-940,348	477,050	—

(4) Revenues/expenditures and profitability

Unit: NT\$1,000

Company	EBT from continuing operations	Net earnings after tax	Earnings per share after tax	Net earnings rate (%)	ROA (%)	ROE (%)
TFH and subsidiaries, consolidated	6,996,786	7,123,945	0.79	11.70	0.19	3.15
TFH only	7,115,731	7,123,945	0.79	99.60	3.09	3.15
Bank of Taiwan	8,502,509	8,152,201	1.81	29.13	0.23	3.45
BTLI	-1,406,401	-940,348	-1.88	-1.40	-0.16	-47.05
BTS	-66,465	-63,265	-0.21	-16.78	-1.29	-2.07

Note 1: The losses incurred by TFH's life insurance subsidiary were due primarily to the financial crisis, which forced asset writedowns of NT\$1.720 billion

2: The losses incurred by TFH's securities subsidiary were due primarily to the financial crisis, which caused investment gains to fall short of what was expected.

(5) Research and development

TFH and its subsidiaries engaged in the following R&D activities in 2008:

(i) TFH

- (a) We sent senior management to take part in overseas seminars and learn about financial holding company business strategies and resource integration.

- (b) We developed and set up a platform for integration of groupwide financial information, new products, and laws and regulations, to be accessed via company intranet. The platform enables information sharing, and saves on costs.
- (c) To spur increased exchange of knowledge, we integrated groupwide research resources, held a major international financial forum, made plans to invite Nobel laureate Dr. Paul Krugman to speak in Taiwan, and arranged opportunities for the business, government, and academic communities to hear Dr. Krugman's ideas.

(ii) Bank of Taiwan

- (a) The bank continued working to improve its capacity for analysis of domestic and international economic, financial, and business conditions. It also issued business and financial publications, as well as various periodical and non-periodical reports, to serve as reference for the bank's other units in their efforts to grow their business and provide guidance to customers.
- (b) The bank helped TFH to develop group businesses, and integrate information and channels, to tap into group synergies.

(iii) BTLI

- (a) BTLI developed new insurance products to meet consumer and trade-marketing needs.

- (b) Took part in a research project contest organized by the Ministry of Finance, building up valuable capabilities in the process.
- (c) Adopted key technologies, streamlined operating procedures, improved service quality and competitiveness.

(iv) BTS

- (a) Hired and trained securities personnel, and sent employees to take part in training programs.
- (b) Established a managerial accounting system to support planning, control, performance evaluations, and decision making.

2. 2009 business plan

(1) Basic business strategy

- (i) Coordinate with government policy by expanding the scope of our business and catalyzing financial industry consolidation. Actively plan overseas M&A strategy and benefit from economy of scale.
- (ii) Look to the world's leading financial holding companies as our guideposts as we work to become the principle force for both stability and reform in Taiwan's financial markets. Live up to the core values and social responsibilities that we rightly take up as the nation's flagship financial holding company.
- (iii) Accelerate the process of making the company more international. Establish strategic tie-ups with the world's leading financial holding companies. Introduce modern managerial techniques.
- (iv) Use the financial holding company organizational setup to exercise comprehensive management over integrated groupwide resources. Carry out risk management. Develop bundled sales involving our best products. Move toward a multicore business model. Lay the groundwork for a sustainable business.
- (v) Take full advantage of our competitive advantages as a corporate group. Work to improve capital efficiency. Reduce operating costs and create synergies through cross-selling. Build up unique competitive advantages as a corporate group.

(2) Business targets

Unit: NT\$1,000

Subsidiary	Line of business	Target for 2009
Banking	Lending	1,800,000,000
	Deposit taking	2,420,700,000
	Foreign exchange	US\$87,000,000
Life insurance	Premium income	33,460,071
Securities	Brokerage	450,000,000
	Underwriting	150,000
	Dealing	1,850,000

(3) Credit ratings

TFH was established in January 2008, and plans to have itself rated by credit ratings agencies in 2009. The most recent credit ratings for the Bank of Taiwan are shown in the following table:

Ratings agency	Last rating	Assigned rating		Outlook
		Long-term credit	Short-term credit	
Standard & Poor's	Oct. 2008	A+	A-1	Stable
Moody's Investors Service	Jan. 2009	Aa3	P-1	Stable

Looking to the year ahead, Taiwan's domestic economy has been weaker than expected due to the financial tsunami, so the government has introduced a series of economic stimulus measures since the latter half of 2008, including: expanded infrastructure development projects; issuance of spending vouchers; job creation measures; financial assistance for low-income groups; tax cuts; and the opening of Taiwan to tourists from mainland China. These measures are expected to be helpful. In addition, the government is working to improve cross-strait relations and provide enticements to attract back to Taiwan capital that has been parked overseas, and has adopted a "three supports" policy (government supports banks, banks support enterprises, enterprises support employees) and introduced a blanket guarantee for all bank deposits to bolster confidence in the financial system. In addition, it appears likely that three cross-strait MOUs on financial supervisory cooperation will be signed in the near future, which will be an event of momentous significance for financial institutions and enterprises in other sectors, as well.

We find ourselves in an age of great challenges and opportunities. We are presented with a chance to cast off old ways of thinking, and achieve decisive change. TFH intends to implement flexible marketing strategies, solidify the foundations of our business, tap into group synergies, post strong business results, and become the nation's flagship financial holding company, characterized by both high performance and stability. The government has bestowed upon us a great mission, and the business world looks to us with great anticipation. On both counts, we will do everything it takes and more to ensure that the hopes invested in our company's establishment will not go unanswered.

President

Chairperson

II. Company profile

1. Date of establishment: 1st January 2008

2. Company history

At a Cabinet meeting on 15th August 2007, Taiwan's premier issued instructions to begin preparations for establishment of Taiwan Financial Holdings (TFH), and on 1st January 2008 TFH was established (in accordance with the provisions of the Financial Holding Company Act, the Company Act, and other applicable laws and regulations) as Taiwan's first state-run financial holding company by the Bank of Taiwan in a share swap. On the following day (2nd January), the Bank of Taiwan spun off its securities and life insurance businesses to create group subsidiaries BankTaiwan Securities and BankTaiwan Life Insurance, thus bringing into existence Taiwan's first wholly government-owned financial holding company, with three wholly owned subsidiaries.

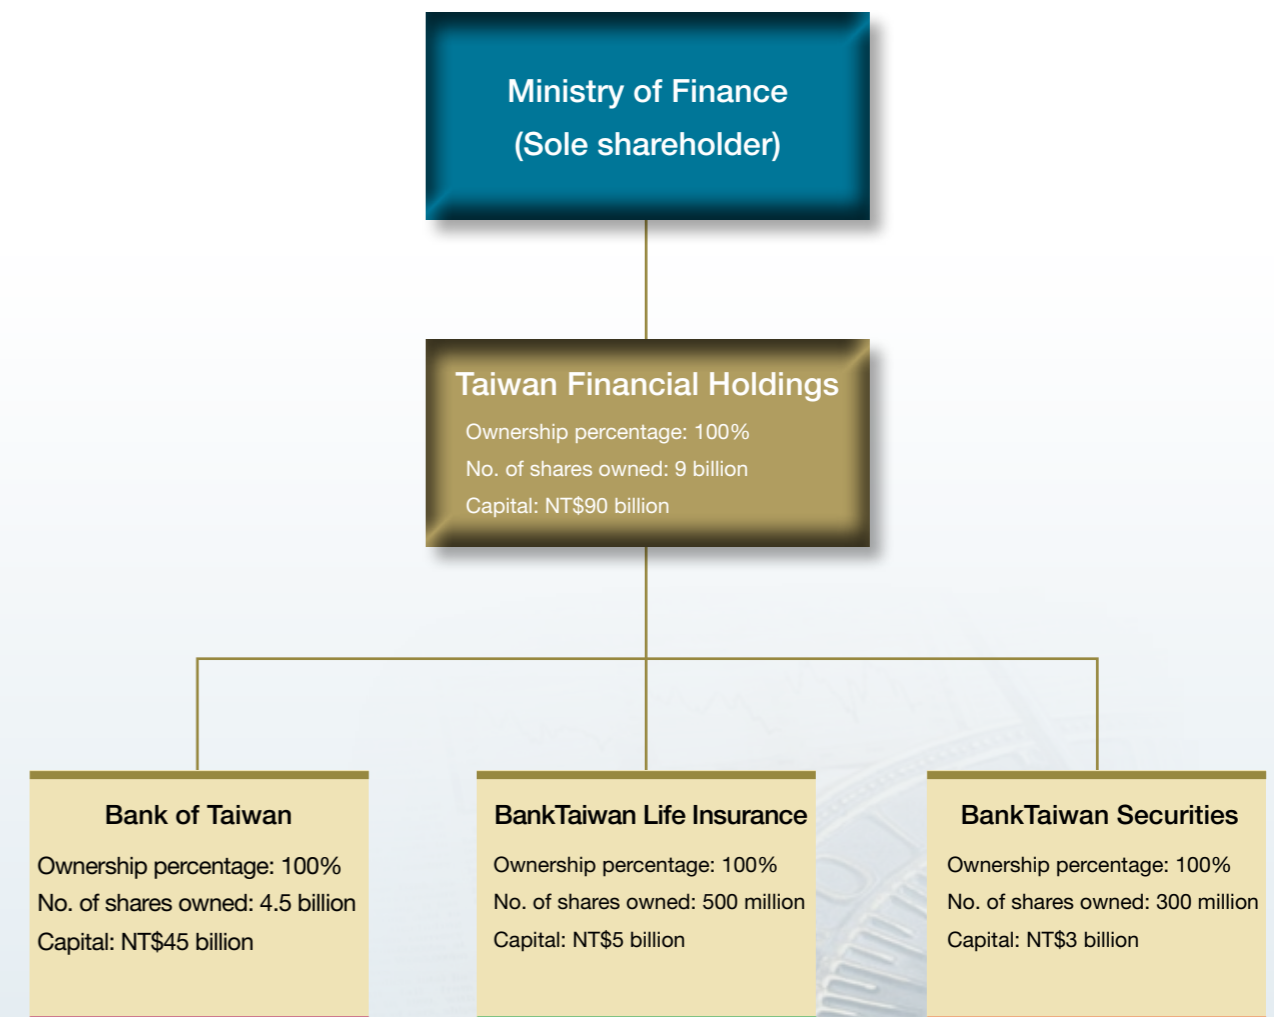

The "Act Governing the Taiwan Financial Holdings Company" (promulgated by the president on 26th November 2008, and entered into force retroactively from 1st January 2008) provided a complete set of statutory procedures for the company's establishment, and empowered TFH to take over other financial institutions through M&A deals in accordance with the provisions of the "Financial Holding Company Act."

3. Implementation of corporate governance

(1) The state of operations of the Board of Directors

The Board of Directors met 21 times (denoted as "A" in the following table) in 2008, with attendance as shown:

Job title	Name	Meetings attended (B)	Meetings attended via proxy	Actual attendance rate (B/A) (see note)	Remarks
Chairperson	Susan S. Chang	11	0	100.00	Appointed 14th July 2008
Chairperson	Jer-Shyong Tsai	10	0	100.00	Appointed 31st Aug. 2007 Appointment ended 14th July 2008
Director	Fan-Chih Wu	17	1	100.00	Appointed 31st Aug. 2007 Appointment ended 12th Nov. 2008
Director	Tse-Cheng Lo	20	1	100.00	Appointed 31st Aug. 2007
Director	Sheng-Yann Lee	19	1	100.00	Appointed 31st Aug. 2007 Appointment ended 20th Dec. 2008
Director	Jun-Ji Shih	16	5	100.00	Appointed 31st Aug. 2007
Director	Hui-Ling Lin	13	3	100.00	Appointed 31st Aug. 2007 Appointment ended 30th Sep. 2008
Director	Hao-Min Chu	15	5	100.00	Appointed 31st Aug. 2007 Appointment ended 20th Dec. 2008
Director	Jen-Shou Hsu	13	1	100.00	Appointed 21st Dec. 2007 Appointment ended 20th Aug. 2008
Director	Wei-Hao Ting	21	0	100.00	Appointed 1st Jan. 2008 Appointment ended 20th Feb. 2009
Director	Chin-Tien Liu	6	1	100.00	Appointed 1st Jan. 2008 Appointment ended 26th May 2008
Director	Frank Kuen-Bao Ling	19	2	100.00	Appointed 21st Dec. 2007
Director	Chung-Hua Shen	16	3	90.48	Appointed 1st Jan. 2008
Director	Yi-Hsiung Hsu	14	0	77.78	Appointed 12th Mar. 2008
Director	Fu-Chun Chu	7	0	100.00	Appointed 20th Aug. 2008
Director	Yao-Shing Wang	2	0	100.00	Appointed 12th Nov. 2008 Appointment ended 20th Dec. 2008
Director	Fu-Chi Tsai	1	0	100.00	First appointed on 31st Aug. 2007 Appointment ended 1st Jan. 2008 Reappointed 20th Dec. 2008
Director	Fu-Teng Hsieh	1	0	100.00	Appointed 20th Dec. 2008
Director	Chang-Ming Chen	1	0	100.00	Appointed 20th Dec. 2008

Note: Each person's attendance rate (%) is calculated by dividing the number of board meetings during his/her tenure by the number of meetings attended during that same period.

Other notes:

- Has any of the matters set out under Article 14-3 of the Securities and Exchange Act arisen? Or has an independent director given a dissenting opinion or qualified opinion regarding a Board of Directors resolution, with said opinion noted in records or a written statement? If yes, note the date of the board meeting, the meeting number, the content of the agenda item, and how the opinions of all independent directors and independent supervisors were handled:
No such matters came up.
- Have any directors have exercised recusal due to possible conflict of interest. If so, indicate the name of the director(s), the content of the agenda item, the reason why recusal was necessary, and whether the director took part in the vote:
No such matters came up.
- Was any action taken in the current year or the most recent year to upgrade the function of the Board of Directors (e.g. establishment of an audit committee; steps taken to increase information transparency; etc), or to evaluate the Board's execution of its duties?
No such matters came up.

(2) Participation by supervisors in Board of Directors meetings

The Board of Directors met 21 times (denoted as "A" in the following table) in 2008, with attendance as shown:

Job title	Name	Meetings attended (B)	Actual attendance rate (B/A) (see note)	Remarks
Supervisor	Chin-Chen Cheng	18	85.71	Appointed 31st Aug. 2007 Appointment ended 13th Mar. 2008
Supervisor	A-Ting Chou	2	9.52	Appointed 31st Aug. 2007
Supervisor	Chan-Jane Lin	15	93.75	Appointed 31st Aug. 2007 Appointment ended 30th Sep. 2008
Supervisor	Jui-Min Chen	13	65.00	Appointed 31st Aug. 2007 Appointment ended 20th Dec. 2008

Note: Each person's attendance rate (%) is calculated by dividing the number of board meetings during his/her tenure by the number of meetings attended during that same period.

Other notes:

1. Job duties of supervisors:

(1) Were there any communications between supervisors and company employees and shareholders?

The company's supervisors can communicate with employees via written documents, telephone, fax, email, or face to face. Communication channels are excellent.

(2) Were there any communications between supervisors and the chief internal auditor and CPAs (e.g. company financial or business matters discussed, how they were discussed, and the results of discussion)?

(i) The Board of Directors Internal Auditing Department reports regularly to the supervisors on the state of its internal auditing work.

(ii) Our supervisors attend as observers at meetings of the Board of Directors to monitor the company's business and financial operations, and closing of the semi-annual and annual accounts, and provide their views in a timely manner.

2. Did any supervisor attending as an observer at a meeting of the Board of Directors express an opinion there? If so, please indicate the date of the meeting, the meeting number, content of the agenda item, the result of the board vote on the resolution, and the company's handling of the opinion expressed by the supervisor:

No such matters came up.

(3) Disclosures required under the "Corporate Governance Best-Practice Principles for Financial Holding Companies"

Disclosures required under the "Corporate Governance Best-Practice Principles for Financial Holding Companies" were posted on the company's website at www.twfhc.com.tw.

(4) Social responsibility

- (i) As a state-run financial institution, TFH actively accommodated government policy, provided both business firms and consumers with a full range of financial services. Our power financial intermediation spurs industrial activity and development of the national economy, and

contributes to the well-being of the nation.

- (ii) To fulfill our social responsibility, TFH led its subsidiaries in an active push to engage in community service activities. We sponsored advocacy groups for the disadvantaged, community environmental preservation, earthquake relief efforts, and blood donation drives. These activities are our way of giving back to society.

- (iii) In response to the Ministry of Finance Action Plan for Energy Savings and Carbon Reduction, TFH encouraged group employees to sign an online Carbon Reduction Declaration, and adopted a Project for the Implementation of Energy Conservation and Carbon Reduction Measures. Each month, we cut our use of paper, gasoline, electricity, and water, and we encouraged our employees to take active part in tree planting and other greenification activities. TFH is taking concrete action to care for the earth!

- (iv) Group subsidiary Bank of Taiwan has long sought to get more people playing basketball and develop top-notch basketball talent in Taiwan. The bank holds a Summer Basketball Camp every year to help young players hone their skills. If more people play basketball, we will have a healthier society.

(5) Easy access to TFH corporate governance best practice principles and related company bylaws

TFH has placed its governance best practice principles and related company bylaws on its website at www.twfhc.com.tw for easy access.

4. The total number of shares and combined equity stake held in any single enterprise by TFH, TFH subsidiaries, TFH directors, supervisors, and executive officers, and any companies controlled either directly or indirectly by TFH.

31st December 2008

Investee (see note)	TFH investments		Investments by TFH directors, supervisors, and executive officers, and any companies controlled either directly or indirectly by TFH		Combined investments	
	Shares	Ownership stake	Shares	Ownership stake	Shares	Ownership stake
Bank of Taiwan	4.5 billion	100%	-	-	4.5 billion	100%
BTLI	5 billion	100%	-	-	5 billion	100%
BTS	3 billion	100%	-	-	3 billion	100%

Note: Investments made by TFH in accordance with Article 36 of the Financial Holding Company Act.

IV. Capital raised by TFH

1. Shares and dividends

(1) Source of share capital

Date	Issue price	Authorized capital		Paid-in capital		Remarks	
		Shares	Dollar amount	Shares	Dollar amount	Source of share capital	Other
January 2008	NT\$10	9 billion	NT\$90 billion	9 billion	NT\$90 billion	Share swap	see note

Note: The date of record for the share swap with the Bank of Taiwan was 1st January 2008. The transaction was approved by the Ministry of Finance on 30th August 2007 (Letter No. Tai-Cai-Ku 0960038139) and by the Financial Supervisory Commission on 6th December 2008 (Letter No. Jin-Guan-Yin (II) 09620007790).

(2) Shareholder structure, dispersion of ownership, and list of principal shareholders

TFH is a state-run enterprise wholly owned by the government, with its shares owned by the Ministry of Finance.

(3) Share prices, net worth per share, earnings per share, dividends per share, and related information (for the past two fiscal years)

Unit: NT dollars

Item		Year	2008	As of 31st Mar 2009
Price per share	High		-	-
	Low		-	-
	Average		-	-
Net worth per share	Before distributions		25.11	25.12
	After distributions		24.71	24.72
Earnings per share	Weighted average shares		9,000,000,000	9,000,000,000
	Earnings per share		0.79	0.09
Dividends per share	Cash dividends		0.40	-
	Bonus shares	Dividends out of earnings	-	-
		Dividends out of capital reserve	-	-
	Cumulative undistributed dividends		-	-
Return on investments	Price/earnings ratio		-	-
	Price-to-dividend ratio		-	-
	Cash dividend yield		-	-

Note: TFH is a state-run enterprise. Our stock is not exchange-listed, so there is no data for market capitalization or return on investments.

(4) Dividend policy and its implementation

(i) Dividend policy

Under the provisions of the TFH articles of incorporation, if earnings remain after closing of the annual accounts, TFH is required after paying its income taxes that year to first offset any deficit

from previous fiscal years before setting aside 10% to legal reserve. In addition, TFH must also set aside an additional 40% to 60% of after-tax income, along with an amount equal to the figure recorded to shareholders equity under "Unrealized losses on financial instruments," to special reserves. If further earnings still remain, they are aggregated with cumulative undistributed earnings from the preceding fiscal year and distributed in accordance with the provisions of applicable laws and regulations.

Unless and until the accumulated legal reserve equals TFH's authorized capital, the maximum earnings distribution that may be paid out in the form of cash shall not exceed 15% of authorized capital. If there are no earnings, TFH shall not distribute cash dividends or bonuses; provided, however, that if its legal reserve exceeds 50% of its paid-in capital, TFH may distribute the excess in the form of cash dividends and bonuses.

(ii) Dividend distributions in 2008

In closing the annual accounts for 2008, TFH set aside provisions to the legal reserve and the special reserve on the basis of audited after-tax earnings, then distributed cash dividends of NT\$3.59 billion (NT\$0.40 per share). However, in accordance with Article 50 of Taiwan's Government Auditing Act, the earnings reported in TFH's annual accounts are subject to the final approval of the Ministry of Audit. TFH's annual accounts for 2008 are still under review by the Ministry of Audit, therefore the actual amount to be distributed as cash dividends cannot be determined until after Ministry of Audit has finished its review.

2. Issuance of corporate bonds: none

3. Issuance of preferred shares: none

4. Issuance of global depositary receipts: none

5. Issuance of employee stock warrants: none

6. Mergers and acquisitions: none

7. Comments on implementation of capital allocation plan: none

V. An overview of operations

1. Business activities

(1) Scope of business

(i) TFH

(a) Main lines of business: TFH is a financial holding company. Its main lines of business, as required under the provisions of the Financial Holding Company Act, are investing in other enterprises and managing their operations.

(b) Types of business

Unit: NT\$1,000

Item	Year	2008	
		Dollar amount	Share of total
Investment gains/losses recognized under the equity method		7,148,588	99.95%
Other operating revenue		3,612	0.05%
Total revenues and gains		7,152,200	100.00%

(ii) Bank of Taiwan

(a) Main lines of business: In addition to conducting ordinary banking business in accordance with the provisions of the Banking Act, the Bank of Taiwan also (on contract to the Central Bank) handles ancillary matters pertaining to the issuance of New Taiwan Dollar notes and coins, and engages in other lines of business as may be approved by the competent authorities.

(b) Types of business:

Unit: NT\$1,000

Item	Year	2008	
		Dollar amount	Share of total
Net interest income		23,666,146	84.57%
Net fee income		4,685,598	16.74%
Financial assets and liabilities at fair value through profit or loss		-16,641,793	-59.47%
Realized gains (losses) on available-for-sale financial assets		1,621,691	5.80%
Realized gains (losses) on held-to-maturity financial assets		—	—
Investment gains/losses recognized under the equity method		645,772	2.31%
Translation gains/losses		3,823,490	13.66%
Schedule of asset impairment losses, and gains on reversal of impairment		-2,896,101	-10.35%
Schedule of other net non-interest income/losses		10,339,567	36.95%
Gains on property transactions		2,738,530	9.79%
Net earnings		27,982,900	100.00%

(iii) BTLI

(a) Main lines of business: Life insurance; acts on behalf of the government in running military personnel insurance and insurance for men serving alternative military service; other lines of business as may be approved by the competent authorities.

(b) Types of business:

Unit: NT\$1,000

Item	Year	2008	
		Dollar amount	Share of total
Personal life insurance		44,272,566	95.24%
Personal injury insurance		159,428	0.34%
Personal health insurance		692,505	1.49%
Personal annuity insurance		1,025,540	2.21%
Group life insurance		180,416	0.39%
Group personal injury insurance		122,721	0.26%
Group health insurance		21,171	0.04%
Reinsurance assumed		12,900	0.03%
Gross premium income		46,487,247	100.00%

(iv) BTS

(a) Main lines of business: Securities brokering, dealing, underwriting, margin trading services, short selling services, futures introducing broker services, and other lines of business as may be approved by the competent authorities.

(b) Types of business:

Unit: NT\$1,000

Item	Year	2008	
		Dollar amount	Share of total
Securities brokering and underwriting revenue		238,836	67.58%
Interest income		91,695	25.95%
Dividend income		1,169	0.33%
Futures commission revenue		622	0.18%
Other operating revenue		21,075	5.96%
Total operating revenue		353,397	100.00%

(2) 2009 business plan

(i) TFH

(a) Enhancement of corporate governance

- Plan and execute a public offering of shares, and improve information transparency.
- Select a fair and impartial third party to assist with introduction of a corporate governance evaluation mechanism.

(b) Integration of group resources

- To reduce overhead and maximize corporate value, TFH will establish a platform that enables all TFH subsidiaries to make coordinated allocation and shared use of common resources.
- Improve our cross-selling of securities and insurance products, and begin evolving toward a multicore business model.

(c) Management with professionalism

- Establish vertical management by our parent company over the subsidiaries, and a laterally oriented management platform to enable groupwide oversight and coordination.
- Track the growth of our subsidiaries and evaluate their performance to improve groupwide business results.
- Improve our financial management in order to optimize the amount of capital at our subsidiaries and reap synergies in the utilization of capital.

(d) Improvement of risk management

- Make use of information technology to plan and set up a groupwide integrated risk management mechanism and platform.
- Exercise effective control over groupwide and subsidiary-specific risk indicators, and acted in a timely manner to issue warnings and take corrective action.

(e) Business expansion

- Accommodate government policy by formulating plans for business expansion. Add securities investment trust and advisory services, asset management services, and other related lines of business to our corporate group, whether through M&A or by establishing new companies from scratch, thereby creating greater economies of scale and scope.
- Accelerate the pace of internationalization and become a leader in our region by cooperating with the world's leading financial holding companies, bringing in independent directors of foreign nationality, and establishing strategic partnerships with foreign entities.

(ii) Bank of Taiwan

(a) Deposit business

- Improve bulk collections and payments service, integrate wealth management and electronic banking services to become a capital management center for corporations, expand auxiliary banking services, and raise the ratio of demand deposits to total deposits.
- Actively seek to attract foreign exchange deposits to lower the cost of foreign currency capital and increase translation gains.

(b) Corporate finance

- Coordinate with the government's economic stimulus program by actively expanding lending to private-sector companies, especially small and medium enterprises. This support should help Taiwan's industry upgrade and develop.
- Step up sales visits, expand lending where our niche lies, do a better job of assessing credit risks, and factor customer risks into the pricing of loans to reduce overall risk and spur growth in auxiliary services.
- Lead or participate in syndicated loans, develop lending to Taiwan-invested firms throughout the Asia-Pacific region, develop online financing and accounts receivable factoring services, expand corporate finance business, and bring in additional fee income.

(c) Retail Banking

- Improve the bank's Student Loan Portal website, begin sending out payment reminders via recorded phone messages to recipients of student loans and home mortgage loans, and begin sending out text message notices where automatic withdrawals fail to process.
- Capitalize on the bank's base in deposit taking and lending by expanding into international credit card issuance and acquirer services.
- Continue providing year-round 24-hour customer service which, in combination with innovative new marketing channels, will increase product exposure and strengthen competitiveness.

(d) Foreign exchange and international finance

- Make inroads into export financing and outward remittance business, and enhance the breadth and depth of the bank's foreign exchange business and online banking services to put the bank on more solid business footing.
- Closely track market trends and promote structured products, foreign exchange swaps, options contracts, and a host of other products.
- Integrate the bank's domestic and overseas marketing platforms to provide overseas investors and offshore customers with capital management capacity and a full range of personal financial advisory and investment services.

(e) Electronic banking services

- Promote the bank's marketing management system by adding a one-stop "sign on" service window and a software/hardware system operations function to the e-Business website.
- Strengthen information operations, continue expanding system functions (e.g. data warehousing, customer relations management, marketing, and wealth management), and bolster the bank's competitiveness.

(f) Trust business

- Take on more investments in trust and custodial business from customers at home and abroad, generating increased fee income.
- Develop a more diverse range of trust services and integrate the bank's wealth management products, providing customers with a full range of personal financial planning and asset management services.
- Achieve outstanding performance through management and investment of reserve funds for the old Labor Pension Fund and Government Employees Insurance scheme.

(g) Investment business

- Coordinate all NT Dollar and foreign currency investments, and keep close track of financial markets, foreign exchange, and interest rate trends. Trade flexibly in securities while tightly controlling risks.

- Invest carefully, buying blue-chip stocks and high-yield stocks for the bank's core portfolio, while holding shares in mutual funds on a mid- to long-term basis and trading at opportune times to enhance overall portfolio performance.

(h) Government Employees Insurance

- Improve coverage and cash benefits, continue promoting the handling of Government Employees Insurance matters online, hold Government Employees Insurance seminars, and familiarize the staff of insured organizations with related laws and regulations in order to provide quality service to our nation's citizens.
- In response to economic conditions at home and abroad, strengthen management and use of the Government Employees Insurance reserve fund to improve returns.

(i) Wealth management

- Formulate a plan for integrated marketing operations. The idea is to innovate management and provide a more diverse range of superior financial services by introducing new products and adopting new marketing methods.
- Capitalize on the bank's competitive strength in e-banking by encouraging customers to submit trading orders online for mutual fund products and "gold passbook" accounts. Market the bank's wealth management services to retired demographic.
- Sharpen the professionalism of personnel handling wealth management, and organize lectures on investing and management of personal finances to provide customers with professional expertise and develop long-term relationships with them.

(iii) BTLI

(a) Market-driven product research

- Take advantage of the group's banking channel and BTLI's own strong customer base to design insurance products with a tie-in to the group's wealth management services. This will enable BTLI to provide customers with a full range of asset allocation choices.
- Capitalize on BTLI's affiliation with the TFH group by developing group accident insurance products for persons retired from the military, civil service, and teaching professions, thereby reducing their reliance on traditional insurance policies and expanding into a unique niche market.
- Respond to aging demographics in Taiwan by continuing to design investment-linked and annuity-type insurance products, as well as policies that provide for long-term nursing care.

(b) Establishment of strong marketing channels

- Use groupwide resource sharing and cross-selling arrangements to take advantage of BTLI's status as Taiwan's only state-run insurance company and move toward a "dual-core" business model (i.e. bancassurance and traditional channels). These innovative new steps should enable the company to expand the range of its business activities.

- Meet with leading insurance brokers and insurance agencies, make an aggressive push to join hands with the best industry players, expand marketing channels, and build a solid business foundation.

(c) Improved returns on capital

- Establish a management mechanism that keeps assets and liabilities in line with risk-adjusted returns. Effectively allocate capital, guard more closely against investment and operational risk, and achieve a higher overall rate of returns on capital.
- Keep close track of both internal and external factors, including macroeconomic conditions and financial industry trends, as well as the company's own capital sources and allocations, and on the basis of the resulting findings develop appropriate products and make flexible use of marketing strategies designed to yield the best possible risk-adjusted return on investments.

(d) Strong sales force

- Keep up with rapidly expanding sales by aggressively recruiting new talent with expertise in fields such as life insurance, marketing, actuarial practice, and asset management.
- Enhance education and training programs, encourage employees to take part in professional development courses and obtain professional licenses, and work to improve sales force capabilities.

(e) Optimization of after-sales service

- Streamline claims settlement procedures, strengthen insurance conservation measures in connection with policy surrender cases, and take steps to reduce adverse selection, mortality gains/losses, and expense gains/losses.
- Strengthen the company's after-sales service system, and improve persistency rates and repeat-purchase rates.

(iv) BTS

(a) Brokerage business:

- Take advantage of groupwide resources by setting up special securities business counters at branches of the Bank of Taiwan and BTLI, and providing services via the group's online banking channel.

These innovations will enable BTS to expand its securities brokerage business.

- Actively tap into groupwide marketing resources to expand the customer base, increase the share of business accounted for by institutional investors, and grow market share.
- Improve the company's electronic order submission system by upgrading to faster and more functional broadband connections, thereby enabling the company to grow its online trading business.
- Guide company branches through the process of setting up business operations and establishing risk management systems, thereby bringing about stable business growth and enhanced competitiveness.
- Establish an operations center, coordinate measures to achieve standardization, cut back on the number of personnel needed for marketing, and achieve improved business performance.

(b) Underwriting business:

- Take advantage of holding company resources, engage in cross-selling with other group affiliates, identify potential high-quality customers, and actively seek opportunities to serve as the lead underwriter for securities offerings.
- Gather information on listings and share offerings by public companies on organized exchanges and OTC markets, establish a marketing database, and attract the business of high-quality customers in order to act as an intermediary in Taiwan's capital markets.
- Actively train underwriting personnel, improve the quality of service provided by the company's underwriting team, and establish long-term strategic partnerships with customers in order to achieve growth in operating revenues and profits.

(c) Securities dealing

- Use the group's professional research to keep close track of economic trends, flexibly adjust proprietary trading strategies, build a stably profitable investment portfolio, and improve trading performance.
- Send company personnel to take part in training courses and observation visits both at home and abroad so that they can build up practical experience, hone their professional skills, develop trading experience and techniques, and develop a subtle grasp of what it takes to stay profitable.
- Improve the company's principal trading management system to ensure tight control of investment risks and make effective use of hedging instruments to achieve steady investment returns.

(3) Future research and development projects

(i) TFH

- (a) TFH will embark upon the second phase of efforts to integrate internal resources and create a groupwide resource sharing platform. Products and channels will be a particularly important focus of resource integration efforts. In the meantime, the resource sharing platform is intended to provide all group affiliates with access to shared IT resources, personnel, research papers, media relations materials, procurement arrangements, and real estate management resources. TFH has been moving ahead first on those aspects with the greatest cost-benefit potential. These moves toward integration promise to maximize the benefits of group synergy.
- (b) TFH will develop an integrated risk management mechanism, making use of four key aspects of risk management – strategy, organization, procedures, and information systems – to implement integrated risk monitoring and control, thereby reducing the risks associated with cross-selling.

(ii) Bank of Taiwan

In response to changing economic conditions and its own business development needs, the Bank of Taiwan will continue to carry out research relating to business innovation and development and other issues pertaining to the financial services industry. And in order to spur its employees to improve their job skills, the bank will also encourage them to put forward work-related proposals, take on self-directed research, and travel abroad to take part in advanced professional development activities.

(iii) BTLI

BTLI in 2009 will continue to take part in the research project contest held by the Ministry of Finance. BTLI's contest entry for 2009 will be entitled "Adapting to an Aging Society – A Study on the Market Potential for Commercial Annuity Insurance in Taiwan." The study will focus primarily on products, marketing, and customer needs, and propose a feasible method for selling annuity insurance that will meet the need of customers to plan for retirement. Developing this market would help to build a more complete social safety net.

(iv) BTS

- (a) BTS will apply for a hedge account, research hedging mechanisms, design hedging strategies, and hedge its own mid- and long-term equity positions to optimize the performance of its investment portfolio.
- (b) BTS will study laws and regulations from throughout the East Asian region regarding securities issuance and underwriting, and make plans for the development of international underwriting services.

(4) Long-term and short-term business development plans

(i) TFH

(a) Short-term business development plan

Capitalize on the group's advantageous position as a financial holding company by integrating groupwide marketing resources, establishing a mechanism for cooperation among group affiliates, strengthening the group's cross-selling capabilities, and pursuing "multi-core" growth in consumer banking, corporate finance, foreign exchange, life insurance, trust services, wealth management, and securities. Carefully plan for the use of our banking subsidiary's superior channels to strengthen the competitiveness of our life insurance and securities subsidiaries, put them on more solid business footing, enable them to contribute a larger share of groupwide profits and spur overall growth in business volume and profitability, achieve better business performance, and execute the roadmap we have set forth for ourselves as the nation's flagship financial holding company.

(b) Long-term business development plan

Work within the framework of our group's business roadmap to develop a long-term business development plan, and grow our organization internally to expand group operations in the domestic market, gradually building out a presence across the full spectrum of the financial services industry, thereby achieving greater business volume and profitability. Accelerate moves to establish an overseas presence in tandem with the progress of internationalization in the financial services industry. Lay plans to establish cooperative relations with the world's leading financial holding companies or equity tie-ups with foreign entities, establish strategic partnerships, introduce modern managerial techniques, and work toward becoming one of the leading financial holding companies in the East Asian region.

(ii) Bank of Taiwan

(a) Short-term business development plan

Consolidate the bank's existing strengths in channels and business operations, actively expand into corporate finance and consumer banking. Provide a diverse range of international financial services, and become a capital management center for Taiwan-invested businesses operating overseas and in mainland China. Continue expanding the scope of wealth management services, and provide customers with a wider array of choices in their investments and personal financial planning. Capitalize on our position as a market leader to aggressively promote our gold trading services. Evaluate how and whether the company has benefited from recent reorganization efforts, continue forward with further organization changes, and consolidate our position as a leading bank.

(b) Long-term business development plan

Build up business competence, identify the best growth strategies, search for appropriate M&A targets, expand into a broader range of business activities, expand the size of operations, actively establish new overseas locations, join them together with domestic branches into a tight-knit international network, and develop into a world-leading bank.

(iii) BTLI

(a) Short-term business development plan Use groupwide resource sharing and cross-selling arrangements, continue implementing various business plans, move toward a "dual-core" business model (i.e. bancassurance and traditional channels), develop a diverse range of competitive new insurance products designed to accommodate the changing structure of society, and work together with other group affiliates to establish our marketing channels as a leading brand in the hope of achieving faster business growth and fully reaping the benefits of group synergy.

(b) Long-term business development plan

Take advantage of the opportunities afforded by e-business marketing channels, research strategies for the diversification of marketing channels, set up a high-performance, high-value management information system, implement effective customer relations management, improve our insurance product design capabilities, improve our expertise in long-term asset planning and management, and work to become one of Taiwan's five largest insurance companies.

(iv) BTS

(i) Short-term business development plan

Conduct business with top priority on stability, concentrate on getting the basics right and perfecting operations, use the group's cross-selling platform to actively expand the company's customer base, increase market share, establish a comprehensive risk management system, effectively control overall risk, and achieve better business results.

(ii) Long-term business development plan

Formulate overall strategic goals, adopt concrete plans to bring the company roadmap to fruition, actively expand into a more diverse range of business activities, and move step by step toward the goal of "cultivating our business in the capital markets and developing into an investment bank."

2. Benefits of cross-selling

(1) Setup of specialized counters at group affiliate locations to provide customers with one-stop financial service

Specialized business counters are a key cross-selling tool. After going into business in January 2008, TFH began planning to set up a cross-selling system. Before the year was out, we had obtained approval from the Financial Supervisory Commission to establish 163 insurance counters and 156 securities counters at branches of the Bank of Taiwan to integrate our banking, insurance, and securities sales forces, establish an efficient and integrated cross-selling platform, and use our highly developed banking channels and overwhelmingly superior customer base to provide customers with integrated, one-stop financial services and reap the benefits of group synergy.

(2) Benefits of cross-selling

- (i) Cross-selling of life insurance via the Bank of Taiwan went extremely well in 2008, bringing in first-year premiums of NT\$29.3 billion (of 79.19% of BTLI's total first-year premiums) and NT\$1.02 billion in insurance service charge revenues, up by 115.44% and 73%, respectively, from 2007. These results clearly demonstrate the synergies released by cross-selling, and the brand value of the Bank of Taiwan channel.
- (ii) Buoyed by the strength of the Bank of Taiwan channel, BTLI in 2008 achieved first-year premium income of NT\$37.0 billion, up by 88.23% year-on-year and vaulting the company's industry rank for market share from 13th to 6th. Total premium income, in the meantime, came to NT\$49.5 billion, up 61.93% year-on-year and the 3rd best growth rate in the industry.
- (iii) The group's banking channel in 2008 referred NT\$77.8 billion worth of brokerage business to BTS, and the Bank of Taiwan acted as lead bank in 49 syndicated loan deals, up 36% over the previous year.

3. TFH's geographical footprint

(1) Bank of Taiwan

The Bank of Taiwan does business in the fields of banking, trust services, procurement, and trade, and has branch units in principal cities throughout Taiwan. It currently has 163 business locations,

and in order to develop its international financial services and increase its overseas earning potential, in addition to existing offshore banking units (OBUs), the bank has also set up branches in New York, Los Angeles, London, Hong Kong, Tokyo, Singapore, and South Africa, as well as a foreign trade center in Panama. By expanding its operations network, the bank is able to provide first-rate financial services to its customers.

(2) BTLI

BTLI's main products fall within the category of insurance of the person (i.e. "life insurance" in the broadest sense of the term), and are sold only in Taiwan, where the company has eight branches, five correspondence offices, and 64 contracted agencies and brokerages. The company also has cross-selling facilities at 163 Bank of Taiwan locations, and 690 cooperative marketing points at the business locations of nine contracted financial institutions. These business locations form a marketing channel with outstanding coverage.

(3) BTS

BTS is principally engaged in securities brokering, dealing, and underwriting. Its customers include both institutional and individual investors, mainly in Taiwan. The company has seven branches, cross-selling facilities at 156 Bank of Taiwan locations, and very strong online banking operations, via which it provides customers with a full range of services relating to investment and personal financial planning.

4. Corporate responsibility and ethics

- (1) TFH is a state-run enterprise, and the MOF is the sole shareholder. Apart from certain activities undertaken in support of government policy, our business is no different from that of any private-sector enterprise, and is run with an eye to improving groupwide performance, maximizing profits paid to the treasury and bolstering the government's finances.
- (2) TFH has taken a number of actions to support the economy and the government's "three supports" policy, including the following: help enterprises get access to operating capital; grant mortgage relief to involuntarily unemployed residents of owner-occupied homes, including deferment or rescheduling of principal; provide concessionary loans to caring enterprises that elect not to lay off employees; and aggressively hire temporary workers in response to the government's call to provide short-term job opportunities. These actions are designed to stabilize the nation.
- (3) Ever since its establishment, TFH has taken its social responsibilities very seriously, and for this reason has required its subsidiaries to participate in disaster relief efforts and many other types of community service activities. We encourage group employees to take part in tree planting and other greenification activities, and to take concrete steps to reduce energy consumption and their carbon footprint. In these and many ways, TFH is giving back to society.
- (4) TFH and its subsidiaries have adopted management systems, and update them as necessary in response to legal and regulatory changes to ensure proper legal compliance. We run our businesses fairly and impartially, and are very concerned about upholding the legal rights and interests of all employees, customers, and other stakeholders. Our financial and operating information is disclosed in a transparent and timely manner, and we adhere strictly by our corporate governance principles so as to serve as a model of responsibility within the financial services industry.
- (5) TFH and its subsidiaries each have an employees' handbook and a code of conduct that require all directors, supervisors, executive officers, and rank-and-file employees to carry out their duties in an honest and ethical manner. They are required to avoid conflicts of interest, refrain from using their positions for personal profit, maintain the confidentiality of undisclosed information, safeguard company assets, and allocate them effectively. TFH and its subsidiaries are serious about ensuring the ethical conduct of their employees, and examine ethical issues closely when evaluating job performance, so as to promote a corporate culture that emphasizes ethical ideals, and to establish a clean and capable image for state-run enterprises.

5. Labor relations

(1) Employee benefits, labor agreements, measures to safeguard employee interests:

(i) Employee benefits:

TFH and its subsidiaries attach great importance to labor relations. We provide Government Employees Insurance, Labor Insurance, and National Health Insurance, as required by law, and in addition to that each of our subsidiaries also has an employee benefits committee, which is responsible for providing financial assistance payments to employees who are hospitalized due to injury or illness, recreational activities, and retirement benefit supplements. In addition, we periodically hold fire drills and regularly inspect fire fighting equipment in an effort to create a safe working environment.

(ii) Pension system: Administered in accordance with the Labor Standards Act as well as laws and regulations governing civil service employees.

(iii) Safeguarding of employee interests:

To safeguard the interests of employees, each TFH subsidiary has a labor-management council for discussion of specific issues raised by unions, and management also maintains frequent communications with the unions to foster harmonious relations. TFH and its subsidiaries have not been adversely affected during the most recent fiscal year, or in the current year as of the date of this report's printing, by any labor disputes.

(2) Dollar amount of losses from possible future labor disputes, and response measures: None anticipated.

Serving WITH SINCERITY

Our two pledges to the nation

Minority Interest			-
Total Stockholders' Equity	Before distribution		225,967,965
	After distribution (Note 3)		222,377,838

Note 1: The financial information provided above has been audited and attested by Yen-Ling Fang, and Derek Hsu, CPAs at the firm of KMPG Taiwan, who hereby express an unqualified opinion with modified wording because the financial statements of some the company's strategic investees were not audited by the same CPA.

Note 2: The Bank of Taiwan on 4th February 2009 revalued its real estate. The revaluation (approved by the National Tax Administration on 12th March 2009, and effective retroactively from 2nd January 2008) resulted in the recognition of a revaluation gain of NT\$212,411,000 and caused an increase in fixed assets (by NT\$77,482,000) real estate investments (by NT\$134,929,000) and unrealized revaluation gains (by NT\$212,411,000).

Note 3: The figure for retained earnings after distribution is based on the NT\$3,590,127,000 paid by the company to the national treasury in accordance with its statutory budget.

Note 4: The company was established on 1st January 2008 and is currently preparing to conduct a public stock offering, and is therefore included in the financial information for 2008.

2. Financial analysis for most recent five years

(1) Financial analysis

Unit: NT\$ thousand ; %

			2008
Operating Ability	Total Assets Turnover		0.03
	Loans to Deposits Ratio of Banking Subsidiary (%)		66.36%
	NPL Ratio of Banking Subsidiary (%)		1.06%
	The Group's Average Operating Revenue Per Employee		7,021
	The Group's Average Profit Per Employee		821
Profitability	Return on Assets (%)		3.09%
	Return on Equity (%)		3.15%
	Net Margin (%)		99.60%
	Earnings Per Share (NT\$)		0.79
Financial structure(%)	Debt Ratio		1.96%
	Liabilities to Net Worth Ratio		2.00%
	TFH's Double Leverage Ratio		99.80%
Leverage ratio	Operating Leverage Ratio		100.51%
	TFH's Financial leverage ratio		100%
Growth Rates	Growth Rate of Assets		—
	Growth Rate of Profit		—
Cash Flows	Cash Flow Ratio (Note 1)		-5.38%
	Cash Flow Adequacy Ratio (Note 1)		-461.99%
	Cash Flow Reinvestment Ratio		460.66%
Operating Scale	Market Share by Assets		15.39%
	Market Share by Net Worth		13.67%
	Market Share of Deposits of Banking Subsidiary		12.17%
	Market Share of Loans of Banking Subsidiary		10.22%
Capital Adequacy	Capital adequacy ratio	Bank of Taiwan	11.63%
		BankTaiwan Life Insurance (Note 2)	147.66%
		BankTaiwan Securities	1503.00%
	Eligible self-owned capital	Bank of Taiwan	172,902,518
		BankTaiwan Life Insurance	3,840,391
		BankTaiwan Securities	2,696,758
	Group's eligible capital		179,406,811
	Subsidiary's statutory capital requirement	Bank of Taiwan	1,486,972,081
		BankTaiwan Life Insurance	2,600,832
		BankTaiwan Securities	179,425
	Group's statutory capital requirement		128,559,770
	Group's capital adequacy ratio		139.55%

	2008
Paragraph 46 of the Financial Holding Company Act requires disclosure of the ratio of aggregate credit extensions, guarantees or other transactions between all subsidiaries and any single party, single group of related parties, or single group of related enterprises.	Single party (%)
	Single group of related parties (%)
	Single group of related enterprises (%)

Note 1: The cash flow ratio and cash flow adequacy ratio were both negative because the company was established on 1st January 2008 and its subsidiaries have not yet paid out cash dividends, which caused net cash flow from operating activities to be negative.

Note 2: The company has taken (or will take) the following steps to raise BTLI's risk-based capital (RBC) ratio:

(1) BTLI revalued its assets in 2008 and adjusted its capital accordingly.

(2) TFH will increase BTLI's capital by NT\$2 billion in 2009.

(3) TFH will increase BTLI's capital by an additional NT\$4 billion in 2010. This amount has already been included in the budget that was submitted to the Legislative Yuan for approval.

Note 3: Formulas used for the above financial analysis are as follows:

1. Operating Ability

(1) Total Assets Turnover = Net Revenue / Total Assets

(2) Loans to Deposits Ratio of Banking Subsidiary = Total Loans Outstanding / Total Deposits Outstanding

(3) NPL Ratio = Non-Performing Loans / Total Loans Outstanding

(4) The Group's Average Operating Revenue Per Employee = Net Revenue / Total Number of Group Employees

(5) The Group's Average Profit per Employee = Net Income / Total Number of the Group Employees

2. Profitability

(1) Return on Assets = Net Income + Interest Expense - Tax Rate / Average Total Assets

(2) Return on Equity = Net Income / Average Shareholders' Equity

(3) Net Margin = Net Income / Net Revenue

(4) Earnings Per Share = Net Income - Preferred Stock Dividend / Weighted Average Number of Shares Outstanding

3. Financial Structure

(1) Debt Ratio = Total Liabilities / Total Assets

(2) Liabilities to Net Worth Ratio = Total Liabilities / Total Shareholders' Equity

(3) Financial Holding Company's Double Leverage Ratio = Equity Investments made under Article 36, Paragraph 2 and Article 37 of Financial Holding Company Act / Net Worth

4. Leverage

(1) Operating Leverage = (Net Revenue - Variable Cost) / Net Income Before Tax

(2) Financial Holding Company's Financial Leverage = (Net Income Before Tax + Interest Expense) / Net Income Before Tax

5. Growth Rates

(1) Growth Rate of Assets = (Total Assets - Total Assets of Previous Year) / Total Assets of Previous Year

(2) Growth Rate of Profit = (Net Income before Tax - Net Income before Tax of Previous Year) / Net Income before Tax of Previous Year

6. Cash Flow

(1) Cash Flow Ratio = Net Cash from Operating Activities / Due to Other Banks and Overdrafts + Commercial Paper Payable + Financial Liabilities at Fair Value Through Profit or Loss + Bills and Bonds Sold under Repurchase Agreements + Payables with Maturity within One Year

(2) Cash Flow Adequacy Ratio = Five-Year Sum of Net Cash from Operating Activities / Five-Year Sum of Capital Expenditures and Cash Dividends

(3) Cash Flow Reinvestment Ratio = Net cash flow from operating activities / Net cash flow from investing activities

7. Scale of Operations

(1) Market Share by Assets = Total Assets / Total Assets of all Financial Holding Companies

(2) Market Share by Net Worth = Net Worth / Total Net Worth of all Financial Holding Companies

(3) Market Share by Deposits of Banking Subsidiary = Total Deposits / Total Deposits of all Financial Institutions

(4) Market Share by Loans of Banking Subsidiary = Total Loans / Total Loans of all Financial Institutions

8. Capital Adequacy

(1) Group's Net Eligible Capital = Financial Holding Company's Eligible Capital + (Financial Holding Company's Shareholding Ratio × Subsidiary's Eligible Capital) - Statutory Deductions

(2) Group's Regulatory Capital Requirement = Financial Holding Company's Regulatory Capital Requirement + Financial Holding Company's Shareholding Ratio × Subsidiary's Regulatory Capital Requirement

(3) Group's Capital Adequacy Ratio = Group's Net Eligible Capital / Group's Regulatory Capital Requirement

4. Consolidated financial statements for the most recent fiscal year

The Board of Directors

Taiwan Financial Holding Co., Ltd.

We have audited the accompanying consolidated balance sheet of Taiwan Financial Holding Co., Ltd. and its subsidiaries (the Company) as of December 31, 2008, and the related consolidated statements of income, changes in stockholders' equity, and cash flows for the year then ended. These consolidated financial statements are the responsibility of the Company's management. Our responsibility is to express an opinion on these consolidated financial statements based on our audit. We did not audit the financial statements of some investee companies. The Company's investment in those investee companies on December 31, 2008, was \$26,359,199 thousand, constituting 0.70% percent of the related consolidated total, and its equity in earnings of those investee companies was \$2,652,306 thousand, constituting 37.91% percent of the related consolidated total, for the year ended December 31, 2008. The financial statements of those investee companies were audited by other auditors whose reports were furnished to us, and our opinion, insofar as it relates to the amounts included for those investee companies, is based solely on the reports of the other auditors.

We conducted our audit in accordance with the "Regulations Governing Auditing and Certification of Financial Statements by Certified Public Accountants" and auditing standards generally accepted in the Republic of China. Those regulations and standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audit and the reports of the other auditors provide a reasonable basis for our opinion.

In our opinion, based on our audit and the reports of the other auditors, the consolidated financial statements referred to in the first paragraph present fairly, in all material respects, the financial position of Taiwan Financial Holding Co., Ltd. and its subsidiaries as of December 31, 2008, and the results of their operations and their cash flows for the year then ended, in conformity with the "Regulations Governing the Preparation of Financial Reports by Financial Holding Companies" and accounting principles generally accepted in the Republic of China.

As described in note 1(1), the Company was incorporated on January 1, 2008, in accordance with the Act of Taiwan Financial Holding Co., Ltd.

TAIWAN FINANCIAL HOLDING CO., LTD. AND ITS SUBSIDIARIES

Notes to Consolidated Financial Statements

December 31, 2008

(expressed in thousands of New Taiwan Dollars, unless otherwise specified)

(1) Organization and Business

1) Taiwan Finance Holding Co., Ltd.

On January 1, 2008, Taiwan Financial Holding Co., Ltd. (the Company) was incorporated in accordance with the Act of Taiwan Financial Holding Co., Ltd.

The Company engages mainly in investing and managing investee companies. The investing business follows the Financial Holding Company Act.

As of December 31, 2008, there were 8,675 employees in the Company and its subsidiaries.

2) The consolidated subsidiaries

Bank of Taiwan (BOT) was established on May 20, 1946. BOT became a legal entity in 1985 in accordance with the Banking Act of the Republic of China, and transformed into a corporate entity starting from July 1, 2003. BOT became a public company on September 16, 2004.

BOT merged with the Central Trust of China effective on July 1, 2007. The Central Trust of China was the dissolved company, and BOT was the surviving company. BOT is engaged in the following business:

1. all commercial banking operations allowed under the Banking Law;
2. international banking operations;
3. all kinds of savings and trust business;
4. overseas branch operations authorized by the respective foreign governments; and
5. other operations authorized by the central government authorities.

BankTaiwan Life Insurance Co., Ltd. (BTLI) was the life insurance department of BOT and separated from BOT on January 2, 2008, with net assets \$5 billion yielded by BOT as its owner's equity. Its main businesses are life insurance and related businesses.

BankTaiwan Securities, Co., Ltd. (BTS) was the securities department of BOT and separated from BOT on January 2, 2008, with net assets \$3 billion yielded by BOT as its owner's equity. Its main businesses include securities business and auxiliary futures trading services.

(2) Summary of Significant Accounting Policies

The financial statements of the Company and its subsidiaries (the Consolidated Companies) have been prepared in the local currency and in Chinese. The financial statements are the English translation of the Chinese version prepared and used in the Republic of China. If there is any conflict between, or any difference in the interpretation of, the English and Chinese language financial statements, the Chinese version shall prevail.

The Company prepared the accompanying financial statements in accordance with the Regulations Governing the Preparation of Financial Reports by Financial Holding Companies and accounting principles generally accepted in the Republic of China. Significant accounting policies are as follows:

1) Principles of consolidation

The consolidation of financial statements is made in accordance with the requirements of the "Regulations Governing the Preparation of Financial Reports by Financial Holding Companies" and ROC Statement of Financial Accounting Standards (ROC SFAS) No. 7 "Consolidated Financial Statements". All material inter-company transactions have been eliminated in the consolidated financial statements.

The following entities have been included in the consolidated financial statements:

Name of the investor	Name of the subsidiary	Business	Shareholding percentage December 31, 2008
The Company	BOT	Banking	100.00%
The Company	BTLI	Life Insurance	100.00%
The Company	BTS	Securities	100.00%

2) General accounting policies

The Consolidated Companies are government-owned enterprises, and their accounting practices mainly follow the Budget Law, Account Settlement Law, Uniform Regulations on Accounting Systems for Banks Governed by the MoF, and uniform regulations on accounting systems for banks issued by the MoF. The annual financial statements are audited by the Ministry of Audit (the MoA) to ensure that the Consolidated Companies comply with the budget approved by the Legislative Yuan. The financial statements become final only after such an audit by the MoA.

3) Use of estimates

The preparation of the accompanying financial statements requires management of the Consolidated Companies to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosures of contingent assets and liabilities at the date of the financial statements and reported amounts of revenues and expenses during the reporting periods. Actual results could differ from these estimates.

4) Foreign currency transactions

The foreign currency transactions of the Consolidated Companies are recorded in New Taiwan Dollars at the rates of exchange in effect when the transactions occurred. Gains or losses resulting from adjustments or settlements of foreign currency assets and liabilities are reflected in the accompanying statements of income. Foreign currency assets and liabilities at the balance sheet date are translated at exchange rates on that date announced by the Central Bank (CBC closing rates). Any exchange differences resulting from long-term equity investments are recorded as cumulative foreign currency translation adjustment, a separate component of stockholders' equity, and exchange differences resulting from other foreign currency assets and liabilities are reflected in the statement of income.

The financial statements of overseas operating entities reported in functional currencies are translated into New Taiwan Dollars at the exchange rates prevailing on the balance sheet date, with the exception of stockholders' equity, which is translated at historical rates. Translation differences resulting from the translation of these financial statements into New Taiwan Dollars are recorded as cumulative translation adjustment, a separate component of stockholders' equity.

5) Asset impairment

The Consolidated Companies adopted Statement of Financial Accounting Standards No. 35 (SFAS No. 35) "Impairment of Assets". In accordance with SFAS No. 35, the Consolidated Companies assess at each balance sheet date whether there is any indication that an asset (individual asset or cash-generating unit) other than goodwill may have been impaired. If any such indication exists, the Consolidated Companies estimate the recoverable amount of the asset. The Consolidated Companies recognize impairment loss for an asset whose carrying value is higher than the recoverable amount.

The Consolidated Companies reverse an impairment loss recognized in prior periods for assets other than goodwill if there is any indication that the impairment loss recognized no longer exists or has decreased. The carrying value after the reversal should not exceed the recoverable amount or the depreciated or amortized balance of the assets assuming no impairment loss was recognized in prior periods.

The Consolidated Companies assess the cash-generating unit to which goodwill, intangible assets whose useful lives cannot be estimated, and unused intangible assets are allocated on an annual basis and recognize an impairment loss on the carrying value in excess of the recoverable amount.

6) Significant commitments and contingencies

If loss from commitments and contingencies is considered highly likely and the amount can be reasonably estimated, then the loss is recognized currently. Otherwise, commitments and contingencies are only disclosed in the notes to the financial statements.

7) Share swap

The Company complies with Interpretation (96) No. 344 issued by the Accounting Research and Development Foundation for share swaps.

If a company changes into a holding company through share swap and the nature of the change can be categorized as reorganization, the equity of the holding company should equal the original company's book value of net assets. The holding company recognizes paid-in capital including par value as capital stock, the amounts of the stockholders' equity accounts relating to assets and liabilities (such as cumulative foreign currency translation adjustments and unrealized increments on revaluation) in the original accounts, and the others as additional paid-in capital.

8) Financial instruments

The Consolidated Companies account for financial assets in accordance with ROC SFAS No. 34 "Financial Instruments: Recognition and Measurement", under which financial assets are classified into one of following categories: measured at

fair value though profit or loss, available-for-sale, held-to-maturity, carried at cost, and debt investments without quoted price in active markets.

Financial instruments held by the Consolidated Companies are recorded on the trading date (except for bonds and funds, which are recorded on the settlement date) and initially recognized at fair value plus transaction costs, except for financial instruments held for trading purposes, which are initially recognized at fair value only.

Subsequent to their initial recognition, the financial instruments held by the Consolidated Companies are classified according to the purpose of holding as follows:

1. An instrument is classified as at fair value through profit or loss if it is held for trading or is designated as such upon initial recognition. Derivatives that do not meet the criteria for hedge accounting are classified as financial assets or liabilities at fair value through profit or loss. Financial instruments at fair value through profit or loss are measured at fair value, and changes therein are recognized in profit or loss.
 - (a) Bought and held principally for the purpose of selling them in the near term. Derivatives held by the Consolidated Companies, other than hedging securities, are classified in this category.
 - (b) Financial assets or liabilities may be designated as financial instruments measured at fair value through profit or loss to eliminate measurement mismatches for items that naturally offset each other.
2. Available-for-sale financial assets are recorded at fair value, and any change in market value is adjusted against shareholders' equity. Impairment loss is recognized when there is objective evidence of impairment. If there is objective evidence that the impairment loss recognized has decreased in a subsequent period, the decline in impairment loss is adjusted against shareholders' equity.
3. Held-to-maturity financial assets are recorded at amortized cost. Impairment loss is recognized when there is objective evidence of impairment. If the impairment loss subsequently decreases and the decrease can be related objectively to an event occurring after the impairment was recognized, the previously recognized impairment loss is reversed through profit and loss. The carrying value after the reversal should not exceed the realizable amount or the depreciated or amortized balance of the assets assuming no impairment loss was recognized.
4. Financial assets are carried at cost if their fair values are not available. Impairment loss is recognized if there is objective evidence of impairment, and this recognized amount is non-reversible.
5. Debt investments without quoted price in active markets are recorded at amortized cost. Impairment loss is recognized when there is objective evidence of impairment. The carrying value after the reversal should not exceed the realizable amount or the depreciated or amortized balance of the assets assuming no impairment loss was recognized.

9) Hedge accounting

Financial instruments held by the Consolidated Companies which meet all the criteria for applying hedge accounting are treated with fair value hedge accounting. Gains or losses on a hedging instrument resulting from fair-value revaluation or exchange rate variation are recognized through profit or loss in the current year immediately. Gains or losses on a hedged item arising from the exposures to targeted risks is reflected in the face value of that hedged item and recognized through profit or loss in the current year immediately.

10) Financial derivatives

Derivative financial instruments refer to transactions such as forward contracts, interest swaps, cross currency swaps, asset swaps and options that are engaged in by the Consolidated Companies in foreign exchange, interest rate and capital markets. In addition to their application in hedge accounting, derivative financial instruments are for trading purposes. Derivative financial instruments for trading purposes are involved in creating markets, serving customers and other related arbitrage activities.

Derivative financial instruments for trading purposes are assessed by the fair value method. Any relevant net present value created shall be recognized as current gain or loss. Fair value refers to the formal transaction price fully recognized and agreed by both parties. The fair value generally is the trading price in an active market. If there is no trading price available, the fair value should be estimated by a valuation method or model.

The right of set-off of derivative financial instruments measured by the fair value method is enforceable by law. In net settlement, financial assets are offset with liabilities and disclosed in net amount.

11) Repo and reverse repo transactions involving bill and bond investment or debt

Repo and reverse repo bond transactions are the sale or purchase of a bond coupled with an agreement to repurchase or resell the same or substantially identical bond at a stated price. Such transactions are treated as collateral for financing transactions and not as the sale or purchase of trading securities. The related interest revenue or expenses are recorded on an accrual basis.

12) Pecuniary and securities financing and refinancing

Pecuniary finance represents loans to investors for the purchase of securities and is recorded as receivables from pecuniary finance. Such loans are secured by the securities purchased by the investors. These securities are not reflected in the financial statements of the subsidiary BTS. The investors may redeem the collateral securities upon repayment of the loans.

Securities finance represents securities lent to investors and is affected by lending to securities investors securities in custody that are received from pecuniary finance or borrowed from securities finance companies when necessary. Such securities finance is not reflected in the financial statements of the subsidiary BTS. The investors' deposits for borrowing securities are held by the subsidiary BTS as collateral and recorded under securities finance margin deposits received. In addition, investors are required to deposit the proceeds from sales of borrowed securities. Such deposits are accounted for as payables for securities financing.

Pecuniary refinancing represents loans from securities finance companies when the subsidiary BTS lacks sufficient funds to perform pecuniary financing. These loans are recorded as refinance borrowings.

Securities refinancing represents securities borrowed from securities finance companies when the subsidiary BTS does not have sufficient securities to perform securities financing. For securities refinancing, the subsidiary BTS pays margin deposits to securities finance companies. These margin deposits are recorded as refinance margin deposits. The subsidiary BTS also provides securities investors' proceeds from selling borrowed securities to securities finance companies as collateral and records them under receivables from securities refinance.

13) Loans

Loans are recorded by the amount of outstanding principal, with unearned income excluded. Interest income is recognized on an accrual basis using the interest method.

Recording of interest receivable of loans would be suspended if either of the following conditions is met:

1. Collection of payment of principal or interest accrued is considered highly unlikely; or,
2. Payment of principal or interest accrued is over 6 months past due.

Interest revenue is recognized upon receipt of interest for the period when recording of accrued interest is suspended.

14) Allowance for doubtful accounts

For the subsidiary BOT, all loans are recorded as the actual amount lent out and reported at their outstanding principal balances net of any provisions for doubtful accounts. Adequate allowance for doubtful accounts is provided by assessing the balance at the end of the accounting period of loans, accounts receivable, non-accrual accounts, and guarantee reserve.

Based on past experience, BOT records allowance for doubtful accounts by assessing country risk and potential risk of the overall claim portfolio. In addition, in accordance with the "Regulations of the Procedures for Banking Institutions to Evaluate Assets and Deal with Non-Performing and Past-Due Loans", the management evaluates the expected default probabilities of specific claims and records an allowance for doubtful accounts.

The subsidiary BOT classifies all loans at five levels. The sum of the product of the remaining balance at each level and the corresponding percentage is the minimum amount for recording allowance for doubtful accounts.

For the subsidiary BOT, non-accrual loans and accounts receivable—non-accrual account deemed uncollectible are written off upon approval of the board of directors. The recovery of written-off loans is accounted for under the reversal of the allowance for doubtful accounts.

The subsidiary BTLI assesses the allowance for doubtful accounts according to the expected recovery probabilities of all kinds of loans and receivables and the "Regulations on the Procedures for Insurance Institutions to Evaluate Assets and Deal with Non-Performing and Past-Due Loans" issued by the Ministry of Finance.

15) Investment under equity method

Long-term investments in which the Company and its subsidiaries have more than 20% of the investee's voting shares or are able to exercise significant influence over the investee's operating and financial policies are accounted for by the equity method.

The difference between investment cost and underlying equity in net assets shall be accounted for under Statement of Financial Accounting Standards No. 5 "Long-term Investments under Equity Method". If the differences come from assets that can be depreciated, depleted or amortized, then an investor company shall amortize such differences over the estimated remaining economic lives. If the differences come from discrepancies between the carrying amounts of assets and their fair market values, then an investor company shall offset all unamortized differences when conditions causing such over- or under-valuation are no longer present. When the investment cost exceeds the fair value of

identifiable net assets acquired, the excess should be recorded as goodwill. Goodwill shall not be amortized and shall be evaluated on each balance sheet date when there is any indication that goodwill may be impaired. If any such indication exists, the Company estimates the impairment loss on goodwill. When the fair value of identifiable net assets acquired exceeds the cost, the difference should be assigned to non-current assets acquired (except for financial assets not under equity method, assets to be disposed of, deferred tax assets, or prepaid pension or other retirement benefit cost) proportionate to their respective fair values. If these assets are all reduced to zero value, any remaining excess should be recognized as extraordinary gain.

Gain or loss on disposal of long-term equity investment is calculated based on the difference between selling price and book value. The capital surplus arising from long-term equity investment is adjusted to profit and loss based on the percentage sold.

The shares of the Company held by a subsidiary should be calculated in compliance with Statement of Financial Accounting Standards No. 30 "Accounting for Treasury Stock". Unrealized gains or losses from transactions between the Company subsidiaries should be deferred. Deferred gains or losses derived from transactions involving depreciable or amortizable assets are amortized over their useful lives; others should be recognized upon realization.

16) Fixed assets

Land is stated at acquisition cost, which can be revaluated in accordance with related laws. Reserve for land appreciation tax is allocated and recorded as other liabilities. During a land transfer, both land revaluation increments and the reserves for land revaluation increment tax should be transferred with the acquisition cost of such land.

Fixed assets other than land are assessed based on acquisition cost, including capitalization of any interest accrued in obtaining such assets before reaching usable condition. Major additions, improvements and renewals are capitalized, whereas maintenance and repairs are expensed when occurred. Fixed assets without use value or left unused should be reclassified as idle assets, where the cost, cumulative depreciation and cumulative impairment of such assets are all transferred to depreciation and impairment of idle assets.

Depreciation of fixed assets is by the straight-line method over the estimated useful lives of the respective assets. The useful lives of leasehold improvements are the shorter of the lease period or service life. Upon reaching its useful life, if it is still in use, a depreciable asset can have its remaining useful life re-estimated and depreciation expense can continue to be allocated over its residual value.

In compliance with Accounting Research and Development Foundation Interpretation (97) Ji-Mi-Zih 340, the Consolidated Companies have recorded the estimated dismantlement or restoration obligation for a fixed asset while it is not used for producing inventory as the cost of such asset since November 20, 2008. Every single part of the fixed asset that is significant should be depreciated individually.

The Consolidated Companies re-evaluate the remaining useful life, depreciation method and residual value of each fixed asset at the end of each accounting period. Changes in those elements are accounted for as changes in accounting estimate.

The estimated useful lives of fixed assets are as follows:

Land improvement	5 to 15 years
Buildings	8 to 55 years
Machinery and equipment	2 to 20 years
Transportation equipment	2 to 12 years
Other equipment	3 to 10 years
Leasehold improvements	5 years

Gains or losses on the disposal of fixed assets are recorded as non-operating income or loss.

17) Intangible assets

The Consolidated Companies adopted SFAS No. 37 "Intangible Assets". In accordance with SFAS No. 37, intangible assets are recorded at cost except for donation from the government, which is measured at fair value. Subsequent to their initial recognition, their book values are their cost plus their incremental value that resulted from revaluation minus accumulated amortization and impairment loss.

Amortization is computed using the straight-line method. The Consolidated Companies should reevaluate the residual value, estimated useful lives, and amortization method at least once every year. Changes in the above factors will be regarded as changes in accounting estimate. The estimated useful lives of major intangible assets are as follows:

Computer software	3 to 5 years
-------------------	--------------

At the end of each accounting period, the Consolidated Companies evaluate the residual value, the useful life and the method of amortization. Changes in those elements are considered changes in accounting estimate.

18) Other assets-statutory deposits

In accordance with the ROC Insurance Law, the insurance subsidiary should deposit in the Central Bank of China an amount equal to 15% of its issued capital as guarantee for its insurance business. The insurance subsidiary made these deposits in the form of government bonds and financial bills, and such deposits were approved by the Ministry of Finance.

19) Other assets-non-operating assets

The cost of non-operating assets are stated at the lower of net realizable value or book value. The cumulative depreciation and impairment of those non-operating assets are also transferred to non-operating assets. Depreciation expense would continue to be incurred over the remaining estimated useful lives of the non-operating assets.

20) Other assets-collateral assumed

Collateral and assets received are stated at the net realizable value: the amount the Consolidated Companies receive when debtors cannot meet their obligations and the collateral and residuals are auctioned off. Any discrepancy from the initial claim will be reflected as credit loss. Gains or losses on disposition are included in current earnings. The Consolidated Companies recognize impairment loss on collateral on the balance sheet date if the book value of collateral exceeds net fair value.

21) Due to other banks, deposits and remittances

Deposits are recorded at the contracted principal amount or the expected maturity value.

22) Reserve for operations

In accordance with the regulations of the respective authorities, reserve for operations includes provisions for guarantees, losses on breach of contract, etc., and such provisions should be recognized by the banking, insurance and securities subsidiaries.

23) Separate accounts-insurance instruments

The insurance subsidiary is engaged in selling investment-type insurance commodities. The payment of premiums (net of administrative expenses) is recorded in a separate account which should only be used in a way agreed to by the insured. The assets of separate accounts are valued at market price on the balance sheet date, and the Company follows the related rules and financial accounting standards in the ROC to determine the net asset value. In accordance with accounting practices in the insurance industry, the assets, liabilities, revenue and expenses are recorded as "separate account-insurance instrument assets", "separate account-insurance instrument liabilities", "separate account-insurance instrument revenue" and "separate account-insurance instrument expenses", respectively.

24) Pension

Retirement, relief and severance of employees of the subsidiaries BOT, LBOT, BTS and BTLI were calculated based on service years until December 31, 1981. From January 1, 1982, to April 30, 1997, they were dealt with according to "The Regulations on Employee's Retirement, Relief and Severance for State-run Financial and Insurance Enterprises Owned by the Ministry of Finance". The Consolidated Companies contributed 4% to 8.5% of salaries as prior service cost; in addition, employees contributed 3% of total monthly salaries to a pension fund each month. After May 1, 1997, when the Labor Standards Law was implemented, the length of service with the Consolidated Companies is calculated in accordance with the formula for benefit payments set forth in the Labor Standards Law. For cleaning and maintenance workers, service costs equivalent to 8% of total monthly salaries are accrued over the workers' careers based on plan benefit formulas. The workers' pension fund is deposited in an account with the Consolidated Companies for the purpose of paying pension benefits to the workers when retiring.

The Labor Pension Act of the R.O.C. ("the Act"), which adopts a defined contribution scheme, is effective from July 1, 2005. In accordance with the Act, employees of the Consolidated Companies may elect to be subject to either the Act, and maintain their service years before the enforcement of the Act, or the pension mechanism of the Labor Standards Law. For employees subject to the Act, the Consolidated Companies shall make monthly contributions to the employees' individual pension accounts of 6% of the employees' monthly wages. The related net pension cost is recorded in current income based on the actual contribution made to the pension funds.

Since 1997, the defined benefit pension plan has used the balance sheet date as the measurement date to complete an actuarial valuation of accumulated payment obligation in excess of pension fund assets at fair value. At the balance sheet date, the Consolidated Companies recognize minimum pension liabilities and, based on the pension plan's actuarial liabilities, record net pension cost, including current service cost and transitional net assets, prior service cost,

and pension profit or loss, amortized over the average remaining length of service of employees by the straight-line method.

25) Income tax

The income tax of the Consolidated Companies is calculated in accordance with SFAS No. 22 "Income Taxes". Deferred income tax is determined based on differences between the financial statement and tax basis of assets and liabilities, using enacted tax rates in effect during the years in which the differences are expected to be reversed. The income tax effects due to taxable temporary differences are recognized as deferred income tax liabilities. The income tax effects due to deductible temporary differences, utilization of loss carryforwards, and income tax assets is evaluated, and a valuation allowance is recognized accordingly.

The adjustments of income tax for the prior year are recorded as income tax expenses in the current year.

Since the Consolidated Companies are a government-owned enterprise, income tax should be determined by the Ministry of Audit.

In accordance with the Financial Holding Company Act, Article 49, the Company has adopted the Company as the taxpayer to file a consolidated corporate income tax return starting from 2008. Other tax matters should be handled by each entity of the Consolidated Companies. When preparing its financial statements, the Company accounts for its income tax in conformity with SFAS No. 22 "Income Taxes". However, the Company also adjusts the related income tax balance in a reasonable and systematic way to reflect the differences computed for purposes of filing a consolidated corporate income tax return with the Company as the taxpayer. The adjustments resulting from using the Company as the taxpayer to file a consolidated corporate income tax return are recorded under receivable from (payable to) affiliated parties.

26) Revenue recognition

1. Interest income from the Company's banking loans is accrued on the unpaid principal balance in accordance with the terms of the loans. No interest revenue is recognized on loans and other credits that are classified as nonperforming loans until the interest is collected. Interest income from bailout and loan extension is recorded as deferred income in accordance with the government authorities' provision. No interest revenue from the foregoing sources is recognized until the interest is collected. Service income is recognized on an accrual basis.

A cash dividend is recognized as revenue on the ex-dividend date, while a stock dividend can only be booked as an increase in shares rather than as revenue in accordance with ROC generally accepted accounting principles.

2. For BTLI, revenue is recognized in accordance with the requirements of ROC Statement of Financial Accounting Standards (ROC SFAS) No. 32 "Accounting for Revenue Recognition" except for "insurance income". The direct written premiums are recognized when the policy becomes effective, and policy-related expenses, such as commission expenses and agency expenses, are recognized on a cash basis. At the end of each balance sheet date, adjustments are made on an accrual basis. The direct written premium for unearned premium reserves for life insurance liabilities, special reserves, and loss provisions are recognized in order to meet the matching principle.

3. For the subsidiary BTS, brokerage commissions, profit or loss from trading securities, and relevant brokerage securities transaction charges are recognized on the dealing date. Interest income or expenses of margin loans, securities financing and refinancing, bonds purchased under agreement to resell and sold under agreement to repurchase, and brokerage commission for introducing futures contracts are recognized during the transaction periods on an accrual basis. Underwriting commissions are recognized when collected, and underwriting transaction fees are recognized when the contract becomes effective.

27) Earnings per share

Earnings per share are calculated by dividing net income after tax by the weighted-average number of shares outstanding in each period.

(3) Reasons for and Effects of Accounting Changes

The "Principles of Preparing Financial Statements of Life and Non-life Insurance Enterprises" were amended by letter No. 09602505891 of the Insurance Bureau, and the "Regulations Governing the Procedures for Life and Non-life Insurance Enterprises to Evaluate Provision for Premium Reserves" were amended by letter No. 09602505761 of the Insurance Bureau. As of December 31, 2008, the effects of those changes on insurance subsidiaries' financial statements were as follows:

	December 31, 2008	
	After adoption	Before adoption
Unearned premium reserves	369,147	369,147
Special reserves	478,885	1,341,715
Reserve for insufficient premiums	862,830	-
Reinsurance premiums expenses	77,780	77,780
Provisions for insurance policy reserves	48,339,542	48,339,542

The effect on the accounts and amounts of the consolidated financial statements of the Consolidated Companies from the above "Principles of Preparing Financial Statements of Life and Non-life Insurance Enterprises" was as follows:

	December 31, 2008	
	After adoption	Before adoption
Liabilities:		
Reserves for operation and liabilities	1,710,862	1,710,862
Gains or losses:		
Net insurance business income	77,780	77,780
Provisions for insurance policy reserves	48,339,542	48,339,542

For prior years, the subsidiary BTLI recognized premium and interest income regarding overdue premiums only when applicants repaid the premium loans. In order to follow the practice among insurance companies, BTLI recognizes its premium and interest income when the premium loans occur starting from January 1, 2008. For the year ended December 31, 2008, the adoption of this change increased its premium and interest income by \$1,167,444, including premium and interest income of \$1,023,303 belonging to the prior years ended December 31, 2007.

The subsidiary BTLI used to be the insurance department of BOT and now is a wholly owned subsidiary of the Company. Therefore, BTLI is also a government-owned enterprise. Its accounting practice mainly follows the Budget Law, the Account Settlement Law, the Audit Act, and the regulations of related laws. The retained earnings become final only after an audit by the Ministry of Audit. BTLI recognized this accounting change as other miscellaneous income of \$1,023,303 in the accompanying statement of income.

(4) Cash and Cash Equivalents

	December 31, 2008
Cash on hand and petty cash	\$ 9,984,247
Foreign currency on hand	4,966,174
Bank deposits	25,684,230
Notes and checks for clearing	8,921,826
Placement with banks	30,548,484
	<u>\$ 80,104,961</u>

(5) Due from Central Bank and Call Loans to Banks

	December 31, 2008
Call loans to banks	\$ 101,498,807
New-Taiwan-Dollar-denominated deposit reserve-checking account, reserves for deposits-foreign-currency-denominated deposits, etc.	31,407,581
New-Taiwan-Dollar-denominated required deposit reserve	51,025,150
Deposits in Central Bank	812,309,742
	<u>\$ 996,241,280</u>

- 1) The required deposit reserves are determined monthly at prescribed rates based on the average balances of customers' New-Taiwan-Dollar-denominated deposits. The required deposit reserve is subject to withdrawal restrictions, but reserve-checking account and foreign-currency-denominated deposit reserves may be withdrawn anytime and are non-interest-earning.

- 2) As of December 31, 2008, 60% of the deposits collected on behalf of government institutions from government organizations amounting to \$9,984,742 were placed with the Central Bank and not used, according to the regulations.
- 3) BOT, in accordance with the Central Bank's System for Accounting and Allocation of Bank Funds, adopted the RTGS (Real-Time Gross Settlement) clearing system. The purchased CDs (certificates of deposit) serve as the security for overdrafts. As of December 31, 2008, \$20,000,000 in negotiable time certificates were provided as the security for overdrafts. The secured credit limit can be modified at any time; those credits not used at the closing day may still serve as liquid reserves.

(6) Financial Assets at Fair Value through Profit or Loss, Net

	December 31, 2008
Trading financial assets	
Commercial paper	\$ 2,574,117

Foreign government bonds	6,574,952
Trading securities	1,863,267
Beneficiary securities	1,313,221
	<u>61,260,941</u>
Derivative financial instruments	6,857,320
Financial assets designated as at fair value through profit or loss:	
Foreign government and financial bonds	10,537,348
Total	<u>\$ 78,655,609</u>

For details of the valuation of financial assets measured at fair value through profit or loss, please see note 31, "Information on Financial Instruments".

(7) Bills and Bonds Purchased / Sold under Repurchase Agreements and Resell Agreements

As of December 31, 2008, the details of bonds and bills purchased / sold under agreements to resell (repurchase) were as follows:

	December 31, 2008
Bills and bonds purchased under resell agreements:	
Government bonds	\$ 300,000
Negotiable certificates of deposit	700,410
Treasury bills	591,527
Commercial paper	10,729,629
	<u>\$ 12,321,566</u>
Bills and bonds sold under repurchase agreements:	
Government bonds	\$ 19,128,355
Treasury bills	754,219
Commercial paper	368,646
	<u>\$ 20,251,220</u>

(8) Receivables, Net

	December 31, 2008
Accounts receivable	\$ 1,031,595
Long-term receivable	43,647,047
Accrued revenue	379,472
Interest receivable	18,841,215
Insurance receivable	273,909
Due from other insurers	4,921
Refundable income tax	1,390,045
Notes receivable and acceptance notes receivable	2,788,871
Factoring receivable-without recourse	1,298,819
Margin loans receivable	612,571
Other receivables	35,675,811
Subtotal	105,944,276
Less: allowance for doubtful accounts	293,114
Total	\$ 105,651,162

For the year ended December 31, 2008, BOT paid a premium savings account interest rate in excess of the regular rate of 1.7815%, and the resulting interest expense (recorded as other non-interest income) was \$7,730,890, due to executing the government premium savings policy.

As of December 31, 2008, BOT, instead of the government, had paid premium savings interest expenses amounting to \$43,647,047 (booked in long-term receivable).

(9) Loans-Net

	December 31, 2008
Discounts and import-export negotiations	\$ 3,145,217
Short-term loans and overdrafts	428,121,859

Subtotal	<u>10,492,631</u>
Accumulated impairment	167,430
Net	<u>\$ 81,040,624</u>

The subsidiary BOT had impairment of \$44,705 on June 30, 2008, in accordance with the government-published land value, \$7,687 of which was reflected as a decrease in unrealized increments on revaluation, and the other \$37,018 was reflected in the accompanying statement of income.

The subsidiary BOT has revaluated its buildings and land several times over the years. As of December 31, 2008, land had increased by \$63,556,509, and the estimated tax payable on land increment was \$15,599,296 (recorded in other liabilities).

The subsidiary BTLI revaluated its buildings and land on February 4, 2009, and recognized revaluation increments of \$212,411 at January 2, 2008, after approval by the National Tax Administration on March 12, 2009. The fixed assets, real estate investments, and unrealized revaluation increments increased by \$77,482, \$134,929 and \$212,411, respectively, from such revaluation.

To comply with government policy, the Consolidated Companies sold land, buildings and equipment and recognized gains on disposal of property, plant and equipment of \$2,738,530 in 2008.

As of December 31, 2008, the Consolidated Companies' fixed assets were not pledged.

As of December 31, 2008, the part of the buildings and land of the Consolidated Companies were leased out. The book value (including revaluation increments) of the rental land was \$32,619,506. Most of the rental buildings have been fully depreciated over their useful lives. The estimated future lease revenue was as follows:

Period	Amount
2009	\$ 211,499
2010	136,435
2011	68,866
2012	21,130

(24) Pension

The reconciliation of the plan's funded status and accrued pension liabilities was as follows:

	December 31, 2008	
	Regular Employees	Regular Labor
Benefit obligation:		
Vested benefit obligation	\$ (4,439,766)	(325,619)
Non-vested benefit obligation	(2,923,928)	(430,072)
Accumulated benefit obligation	(7,363,694)	(755,691)
Additional benefits based on future salaries	(2,070,022)	(259,665)
Projected benefit obligation (PBO)	(9,433,716)	(1,015,356)
Fair value of plan assets	4,964,905	854,094
Funding status	(4,468,811)	(161,262)
Unrecognized net transition obligation (assets)	641,123	329,478
Unrecognized prior year service cost	215,032	(23,715)
Unrecognized loss (gain)	1,292,519	(248,243)
Additional minimum pension liability recognized	(97,481)	(118,318)
Accrued pension liabilities	<u>\$ (2,417,618)</u>	<u>(222,060)</u>
Vested benefit	<u>\$ (5,622,914)</u>	<u>(404,901)</u>

The components of net pension cost for the year 2008 were as follows:

	2008	
	Regular Employees	Regular Labor
Service cost	\$ 796,664	61,828
Interest cost	222,574	28,896
Projected return on plan assets	(126,813)	(21,871)
Net pension cost	132,645	30,413
Amortization and deferred cost	\$ 1,025,070	99,266
Actuarial assumptions:		
		2008
Discount rate		2.50%
Rate of increase in future compensation		2.00%
Rate of projected return on plan assets		2.50%

(25) Income Tax

The income tax expenses for the year ended December 31, 2008, are summarized below:

	2008
Current income tax	\$ 653,817
Deferred tax benefit	(780,976)
Income tax expense	\$ (127,159)

The Consolidated Companies are subject to ROC income tax at a maximum rate of 25%. For the year ended December 31, 2008, the differences between the "expected" income tax at the statutory income tax rate and the income tax expense in the accompanying financial statements were as follows:

	2008
Expected income tax expenses	\$ 1,749,197
Tax effect of interest income from short-term notes separately taxed	(87,757)
Gain on securities trading	(208,644)
Tax-free earnings from OBU	266,234
Investment gains recognized under equity method	(225,501)
Gain on disposal of land	(680,566)
Impairment loss on financial assets	249,916
Tax-free dividends	(519,046)
Allowance for deferred tax assets	(447,797)
Income tax expenses of overseas branches	(502,894)
Adjustments of outright purchase and sale of bills	277,702
Others	1,997
Income tax benefit	\$ (127,159)

For the year ended December 31, 2008, the major components of deferred income tax benefit were as follows:

	2008
Pension costs disallowed per tax regulation	\$ (79,320)
Decrease in reserve for default losses	23,230
Unrealized gains on foreign exchange	395,398
Impairment loss on financial assets	(455,582)
Income tax expenses of overseas branches	(555,005)
Others	(109,697)
Deferred income tax benefit	\$ (780,976)

The temporary differences, loss carryforward, and tax effects relating to deferred income tax assets were as follows:

	December 31, 2008	
	Amount	Income tax effect
Deferred income tax assets:		
Pension costs disallowed per tax regulation	\$ 2,423,880	605,970
Loss carryforward	5,014,336	1,253,584
Impairment losses on financial assets-overseas	3,403,672	850,918
Losses on valuation of financial assets-overseas	-	340,118
Foreign deferred income tax assets-loss carryforward and exchange effect	-	984,262
Others	164,780	41,195
Subtotal		4,076,047
Allowance for deferred income tax assets		(1,918,147)
		\$ 2,157,900
Deferred income tax liabilities:		
Unrealized gains on foreign exchange	1,575,788	393,947
Others	3,836	959
		\$ 394,906
Deferred income tax assets-net		\$ 1,762,994

BOT's income tax returns for all years through 2006 have been examined by the tax authorities.

Beginning 2008, the Company and its subsidiary BOT adopted a combined income tax declaration to report their tax. As of December 31, 2008, the details of receivables and payables resulting from income tax were as follows:

	2008			
	Tax receivables from affiliated parties (recorded as miscellaneous account receivables)	Tax payables to affiliated parties (recorded as miscellaneous account payables)	Income tax receivables from National Tax Administration (recorded as miscellaneous account receivables)	Income tax payables to National Tax Administration (recorded as miscellaneous account payables)
2008	\$ -	535,654	535,663	-

According to "Income Basic Tax Act", losses can be used as a tax credit for taxable income in the future ten years. Details of the existing tax credit of the Consolidated Companies as of December 31, 2008, were as follows:

	Year loss incurred	December 31, 2008	Last effective year of tax credit
Estimated losses incurred in 2006		\$ 4,709,565	2016
Estimated losses incurred in 2008		304,771	2018
		\$ 5,014,336	

For the year ended December 31, 2008, the reconciliation of the balances of current income tax expense, deferred income tax expense, deferred income tax assets, and income tax receivables under the provisions of SFAS No. 22 "Income Taxes" to the related balances computed for filing combined corporate income tax returns with the Company as the taxpayer was as follows:

	2008			
	Current income tax expense	Deferred income tax gain	Deferred income tax assets, net	Current income tax receivables
Amount computed under SFAS No. 22	\$ 653,817	(780,976)	1,762,994	1,390,045
Difference adjustments	-	-	-	-
Amount computed for filing combined corporate income tax return	\$ 653,817	(780,976)	1,762,994	1,390,045

As of December 31, 2008, unappropriated retained earnings were as follows:

	December 31, 2008
1998 and after	\$ 7,123,945

(26) Stockholders' Equity

1) Common stock

On January 1, 2008, the Company was incorporated through a share swap and issued 9,000,000 shares of common stock with a par value of \$10. As of December 31, 2008, capital stock amounted to \$90,000,000.

2) Additional paid-in capital

The Company reorganized the group members in accordance with the amendment of the Act of Taiwan Financial Holding Co. Ltd. approved by the Legislative Yuan on November 7, 2008. On December 20, 2008, the Company underwent a share capital reduction and increased share capital from capitalization of additional paid-in capital of \$109,467,296 at the same time. The share capital of the Company remained \$90,000,000 after the capital reduction and increase. The change in additional paid-in capital in 2008 was as follows:

	Total
Established on January 1, 2008	\$ 215,854,060
Adjustment for the change in the subsidiaries' special reserve	(320,552)
Used to increase share capital	(109,467,296)
Adjustment for non-cash share capital reduction	5,429,052
Ending balance on December 31, 2008	\$ 111,495,264

3) Legal reserve

The articles of incorporation of the Company stipulate that net income should be distributed as follows:

1. to pay income tax;
2. to offset prior years' deficit;
3. to appropriate 10% as legal reserve;
4. to appropriate 40-60% as special reserve;
5. to appropriate dividends.

The remaining balance is retained or appropriated upon approval of the board of directors.

According to the Company's articles of incorporation, cash dividend distributions cannot exceed 15% of total capital before the legal reserve balance reaches the total amount of capital.

(27) Earnings per Share

	2008	
	Pretax	After tax
Net income (for common stockholders)	\$ 6,996,786	7,123,945
Denominator (shares in thousands)	9,000,000	9,000,000
Basic earnings per share (NT Dollars)	\$ 0.78	0.79

(28) Net Insurance Business Income

	2008
Gross written premiums	\$ 63,414,889
Reinsurance claims recovery	56,419
Investment-type insurance policy revenue	4,756,856
Insurance business income	68,228,164
Re-insurance expense	77,780
Direct business expense	342,373
Benefits and claims	30,023,342
Stability fund	46,954
Investment-type insurance policy expense	4,756,856
Insurance business expense	35,247,305
Net revenue	\$ 32,980,859

(29) Asset Impairment Loss (Gain on Reversal of Impairment)

	2008
Available-for-sale financial assets	\$ 2,895,083
Held-to-maturity financial assets	504,016
Other financial assets	1,318,312
Fixed assets	37,018
Other assets	(36,000)
	\$ 4,718,429

(30) Provisions (Release) for Insurance Policy Reserves

	2008
Provision for policyholders' reserve	\$ 33,694,368
Special claim reserve release	(89,769)
Provision for claim reserve	(19,490)
Provision for insufficient premium reserve	125,832
	\$ 33,710,941

(31) Information on Financial Instruments

1) Information on fair value of financial instruments

	December 31, 2008	
	Book Value	Fair Value
Financial Assets:		
Financial assets at fair value through profit or loss	\$ 78,655,609	78,655,609
Loans	1,997,536,704	1,997,536,704
Available-for-sale financial assets	175,527,297	175,527,297
Held-to-maturity financial assets	117,196,368	117,196,368
Other financial assets	77,978,931	77,978,931
Financial Liabilities:		
Financial liabilities at fair value through profit or loss	5,804,419	5,804,419
Other financial liabilities	6,429,020	6,429,020

2) Methods and assumptions used by the Consolidated Companies for fair value evaluation of financial instruments were as follows:

1. Since these instruments have short-term maturities, the book value is a reasonable basis to estimate the fair value. This method is applied to cash and cash equivalents, due from Central Bank and call loans to banks, bills and bonds purchased under resell agreements, receivables, other financial assets, due to Central Bank and other banks, bills and bonds sold under repurchase agreements, payables, deposits and other liabilities.
2. When the financial assets have a public quotation from an active market, the market price is considered the fair value. If a quoted market price is unavailable, then the fair value is determined based on a valuation model. The estimates and assumptions of the valuation model adopted by the Consolidated Companies are identical to those adopted by other market participants.
3. The interest on loans is calculated by a floating rate; therefore, the book value is the fair value.
4. Most deposits mature within one year. If it matures in more than one year, the interest is calculated by a floating rate. Thus the book value is the fair value.
5. The fair value of each forward contract is determined by the discounted cash flow using Reuters forward rate upon maturity. The fair value of interest rate swaps and cross currency swaps is calculated either by the quotation from the counterparty or by the price from Bloomberg, while the Black Scholes model is applied to evaluate the fair value of options.

3) The fair values of the financial instruments of the Consolidated Companies which were based on the quoted market price or a valuation model were as follows:

	December 31, 2008	
	Quoted market price	Valuation model
Financial assets:		
Financial assets at fair value through profit or loss	\$ 71,798,289	6,857,320
Loans	-	1,997,536,704
Available-for-sale financial assets	172,574,675	2,952,622
Held-to-maturity investments	-	117,196,368
Other financial assets	-	77,978,931
Financial liabilities:		
Financial liabilities at fair value through profit or loss	-	5,804,419
Other financial liabilities	-	6,429,020

For the year ended December 31, 2008, the Consolidated Companies recognized a loss of \$243,796 based on a valuation model.

4) Financial risk information

1. Market risk-BOT

Market risk (also called "price risk") means changes such as in interest rates, exchange rates, and the prices of equity securities and instruments which may result in a loss for BOT, either on or off the balance sheet.

In order to establish and effectively operate the Market Risk Control Mechanism, all subsidiaries, in accordance with their cash capital and operating condition, implement appropriate market risk control in daily operations and management procedures, such as

(a) Identifying, evaluating and analyzing (qualification/non-qualification) risks and adopting appropriate methods (including risk hedging, risk sharing, risk reduction, and risk bearing).

(b) Each unit following the Market Risk Management Guidelines for position management, actively monitoring various limits, and reporting to the responsible unit or the risk management department.

(c) Verifying the position data and profit or loss status with the accounting department to ensure the consistency and completeness of data, and setting up a separate risk management unit to help control BOT's overall market risk.

BOT utilizes the standard method for calculating market risk capital to meet the requirement of the competent authority. In the future, the Bank will adopt a market risk management system and use VAR to enhance risk gain or loss analysis and overall reporting ability. Furthermore, BOT will amend relevant policies and standards in accordance with the request of management agencies and BASEL II.

2. Credit risk-BOT

(a) The possibility of a loss occurring due to the failure of a counterparty or third party to meet contractual debt obligations

Commodities owned and issued by BOT may cause a loss when the contractual debt obligations are not met. Therefore, BOT always conducts credit evaluations in accordance with the Credit Policy and Regulation in handling credit business such as loans, commitments and guarantees. The details were as follows:

(In millions)

Item	December 31, 2008		
	Secured amount	Total amount	Percentage of total amount
Loan (note 1)	\$ 876,621	1,999,743	43.84
Acceptances	133	2,623	5.07
Guarantees on loans	7,976	60,186	13.25

Note 1: Amounts of loans exclude advances and off-balance-sheet items.

Collateral which BOT requires may include a deposit receipt, inventories, machinery and equipment, marketable securities, other property, and guarantees. If the customers default, BOT will, as required by circumstances, foreclose the collateral or execute other rights arising out of the guarantees given. Since most of the commitments are expected to expire without being drawn upon, the total commitment amounts do not necessarily represent future cash demands. The maximum potential amount of future payments represents the notional amounts that could be lost under the guarantees if there were a total default by the guaranteed parties, without consideration of possible recoveries under recourse provisions or from collateral held or pledged.

(b) Credit risk-disclosure of the greatest credit exposure

The book value and greatest credit exposure of various commodities owned by the Company are disclosed below:

(In millions)

Item	December 31, 2008	
	Book value (note 1)	Greatest credit exposure (notes 2 and 3)
Financial assets measured at fair value through profit or loss	\$ 72,202	70,235
Available-for-sale financial assets	155,492	79,773
Held-to-maturity financial assets	31,818	22,677
Loans and advances (note 1)	2,026,969	1,847,245
Hedging derivatives	7,558	28
Debt investments without quoted price in active markets	10,972	10,972
Financial assets carried at cost	11,092	11,092

Note 1: The aforementioned "loans and advances" refer to the outstanding amounts of discounts; overdrafts; treasury overdrafts; guarantee overdrafts; short-term, medium-term and long-term secured/unsecured loans; loan receivables; import bill advances/export bill purchases; overdue receivables; acceptance receivables; guarantee payment receivables; and short-term loans.

Note 2: In the amounts of greatest credit exposure, held-for-trading financial assets exclude government bonds amounting to \$1,967 million; available-for-sale financial assets exclude government bonds amounting to \$46,293 million and negotiable certificates of deposit amounting to \$29,426 million; held-to-maturity financial assets exclude government bonds amounting to \$9,141 million; loans and advances exclude Central Government loans amounting to \$176,559 million and Central Government short-term advance amounting to \$3,165 million.

Note 3: The amount of greatest credit exposure is the fair value at the balance sheet date; the book value of a hedging derivative is the principal of the hedging instrument (IRS); and the amount of greatest credit exposure is the adjusted amount of hedging derivatives at fair value.

(c) Disclosure of obvious concentration of credit risk

When transactions involving a commodity are concentrated in a single industry or location, the ability to fulfill the contract may be affected by economic or other factors; thus, concentration of credit risk occurs. The concentration of credit risk of the Consolidated Companies is disclosed below:

a) The details of loans to various industries and the greatest credit exposure for the year ended December 31, 2008, were as follows:

(In millions)

Industry type	December 31, 2008		
	Book value (note 1)	Percentage of total loans (%)	Greatest credit exposure (note 2)
Individuals	\$ 601,047	30.33	601,047
Government agencies	412,429	20.81	235,870
Manufacturing	451,921	17.76	351,921
Shipping, warehousing and communications	97,649	4.93	97,649
Utilities	100,246	5.06	100,246
Others	418,494	21.11	418,494
Total	\$ 2,081,786	100.00	1,805,227

Note 1: The book value means the outstanding amounts of discounts; overdrafts; treasury overdrafts; guarantee overdrafts; short-term, medium-term and long-term secured/unsecured loans; loan receivables; and import bill advances/export bill purchases.

Note 2: The greatest credit exposure is the remaining amount when loans amounting to \$176,559 million to the Central Government are deducted from book value.

- b) The details of loans to various areas and the greatest credit exposure for the year ended December 31, 2008, were as follows:

(In millions)

Areas type	December 31, 2008		
	Book value (note 1)	Percentage of total loans (%)	Greatest credit exposure (note 2)
Domestic	\$ 1,859,606	93.83	1,683,047
Foreign	122,180	6.17	122,180
Total	\$ 1,981,786	100.00	1,805,227

Note 1: The book value means the outstanding amounts of discounts; overdrafts; treasury overdrafts; guarantee overdrafts; short-term, medium-term and long-term secured/unsecured loans; loan receivables; and import bill advances/export bill purchases.

Note 2: The greatest credit exposure is the remaining amount when loans amounting to \$176,559 million to the Central Government are deducted from book value.

- (d) Off-balance sheet credit risk (including loan commitments, net settlement, and offset rights)

BOT does not have any loan commitments, net settlement, and offset rights which were subject to SFAS No. 34.

3. Liquidity risk

Liquidity risk includes market liquidity risk and capital liquidity risk (financial risk). Market liquidity risk is the risk of facing market price movement in processing or offsetting assets caused by a low-volume market. Capital liquidity risk, on the other hand, is the risk of default at the maturity due to inability to sell assets or obtain sufficient capital. The Consolidated Companies have different policies in accordance with capital demands for different kinds of business aiming to effectively monitor market liquidity risk. The finance department is in charge of the overview of capital and conducts a daily review to respond to system risk and capital demand in abnormal conditions.

In addition to all of the above, the attention and support from senior management are important to the success of the risk management system. Under the authorization of the senior management, the Consolidated Companies are gradually implementing the risk management system.

The Consolidated Companies control the trading risk of commodities by means of the aforementioned position limits, setting stop-loss points and operation guidelines at the management level. In addition, the Consolidated Companies utilize financial tools of the money market and foreign exchange market, together with appropriate liquid assets to plan for future cash demand.

The Consolidated Company's capital and working capital are sufficient to perform all contract obligations, so there is no liquidity risk.

The analysis of maturity of the subsidiary BOT as of December 31, 2008, is as follows:

Asset	December 31, 2008				
	1~30 days	31~90 days	91 days~one year	Over one year	Total
Cash and cash equivalents	\$ 23,869,742	-	-	-	23,869,742

Note: The table contains the amounts for the bank departments of BOT only.

4. Cash flow risk and fair value risk of interest rate change

Floating assets and floating liabilities of the Consolidated Companies may change due to movement in future cash flow caused by movement of market rate, and hence create risk.

(a) Information on expected final maturity and expected reprising date

As of December 31, 2008, the expected reprising date and expected final maturity would not be affected by the contract effective date. The following table shows the interest risk of the Consolidated Companies. Non-derivative assets and liabilities are listed at book value without deducting any allowance or adjustment. Derivative assets and liabilities are listed at book value. The book value is further categorized by the earlier of the maturity date or reprising date. The book values of commodities owned or issued by the Consolidated Companies, categorized by different maturity or reprising dates (the earlier date of the two dates), were as follows:

(In millions of NTD)

(b) Effective interest rate (excluding financial assets for trading purposes)

The effective interest rates, classified by currencies, of the commodities owned or issued by the Consolidated Companies as of December 31, 2008, were as follows:

Subsidiary-BOT

Item	December 31, 2008	
	NTD	USD
Available-for-sale financial assets:		
Government bonds	1.7067%~6.9611%	9.1250%~10.3750%
Financial bonds	2.1100%~2.3000%	1.2750%~6.5000%
Corporate bonds	1.9600%~3.0500%	1.0000%~8.8750%
Negotiable certificates of deposit of Central Bank	1.0200%~2.3100%	-
Taipei City Government bonds	4.6190%	-
Beneficiary certificates-financial assets securitization	2.4600%	-
Beneficiary certificates-real estate investment trust	2.6800%	5.5000%~5.7500%
Foreign organization bonds	-	2.7313%
Held-to-maturity financial assets:		
Government bonds	1.5716%~6.0701%	-
Corporate bonds	1.8911%~1.9493%	-
Beneficiary certificates-financial assets securitization	2.0699%	-
Beneficiary certificates-real estate investment trust	2.4000%	-
Debt investment without quoted price in active markets:		
Financial bonds	-%	5.4700%~6.2600%
Beneficiary certificates-real estate investment trust	-%	0.8113%~2.2450%
Loans and discounts:		
Short-term loans	1.2500%~18.0000%	3.1131%~8.5620%
Medium-term loans	1.0050%~18.0000%	0.6000%~7.5000%
Long-term loans	1.0220%~10.4960%	1.0000%~7.7500%

Liabilities:

Short-term loans	-%	0.1000%~5.2600%
Hedging derivative liabilities:		
IRS	-	2.0150%~14.3938%

5. Fair-value hedge and cash flow hedge

(a) Fair value hedge, cash flow hedge, and hedge of a net investment in a foreign entity should disclose the following:

a) Description of hedging:

Currently the New York, LA, and Singapore branches of BOT adopt fair value hedge accounting and hold IRSs as designated hedging instruments to hedge the exposure to interest risk on investment in fixed-rate bonds; the hedging strategies were as follows:

- When the interest rate trends up, the Consolidated Companies adopt fair value hedging to avoid effects on income by swapping a fixed rate for a floating rate on fixed-rate bonds.
- When the interest rate trends down, the Consolidated Companies adopt cash flow hedging to avoid effects on income by swapping a floating rate for a fixed rate on floating-rate notes.

b) Description and balance sheet fair value of financial commodities designated as hedging instruments:

Hedged item	December 31, 2008		
	Designated hedging instruments	Original amount	Fair value
Foreign bonds	Swap	\$ 4,381,049	57,273
Foreign bonds	Swap	3,176,486	(189,981)

c) Nature of hedged risk:

The hedged items of the hedge accounting adopted by the Consolidated Companies are fixed-rate bond investments. Thus, IRSs are used to hedge interest risk (adopting interest fair value hedging-swapping a fixed rate for a floating rate).

(32) Disclosure of Risk Management Policy

1) The Company

The risk management organization of the Company includes the board of directors, risk management committee, and risk administrative office.

The responsibility of each risk management level is as follows:

- The board of directors is the highest decision-making unit, and it has the final responsibility for the Company's overall risk. According to the overall operating strategies and management environments, the board of directors approves the risk management policies, supervises the operating effectiveness of the risk management system, fully controls the risk situation, and ensures having sufficient capital for dealing with all risks.
- The Company set up the risk management committee under the board of directors to execute the risk management policies approved by the board of directors and coordinate the related risk management matters within the group.
- The risk administrative office is the independent risk management unit and is responsible for the implementation of overall risk management. For all risk management decisions and assignments of the board of directors and risk management committee, the risk administrative office must supervise and follow up the execution by the related units, and present the risk management report to the board of directors and risk management committee. If it finds significant exposure that endangers the financial situation, operations, or legal compliance, the risk administrative office should report to the board of directors immediately.

2) BOT

The major financial assets of BOT are loans, receivables, and securities investments. The related risk and management policy are as follows:

- Credit risk management: including stratified authorization, management of large exposure, concentration management, and a re-assessment system

(a) Carrying out stratified authorization

A system of graded delegation of authority is used in loan cases and the disposition of NPLs. Each authority level has its own credit assessment committee and loan collection assessment committee. The review of loan cases is carried out strictly in accordance with the limits of authorization so as to assure the quality of loans.

(b) Management of large exposure and excessive concentration

- a) In accordance with the Banking Law, loans to BOT's responsible person, BOT's employees, and persons having a material interest in BOT are controlled in accordance with stipulated quotas. The Bank has established rules for credit risk management of loans to enterprise groups and ratios for loan risk exposure to different industries, and it controls credit quotas for trading partners, issuers, and guarantors in accordance with their external credit ratings.
 - b) BOT's Treasury Department, OBU, and foreign branches set up policies based on external credit evaluation for loan quota management in money market, foreign exchange, and negotiable security trading.
 - c) Each year, to spread the risk from different countries, a national risk quota, in accordance with the ranking in Euromoney Magazine, is allocated to the Finance Department, OBU, and foreign branches. The business recorded by BOT includes loan assets, transaction assets, and off-balance-sheet positions.
- (c) Re-assessment evaluates the quality of loan assets. BOT has a re-assessment policy for credit review. After loans are extended, they are reviewed during the loan period in accordance with their review ratings. For important loans, follow-up evaluation is carried out, and reserves against bad loans are allocated for loan assets at the end of every month in order to reinforce BOT's operating system.

2. Market risk management

(a) Daily evaluation

To control risk, each trading unit carries out a daily assessment of foreign trading against trading objectives in accordance with market prices. The major source for evaluation is the public appraisal of negotiable securities in external information systems such as Bloomberg and Reuters.

(b) Limit management

- a) For the trades involving all securities, foreign-exchange positions, and derivatives, BOT regulates the authorized trading amount, kinds of sales/purchases, invested objects, and gain or loss limits to control risk effectively.
- b) In the management of New Taiwan Dollar funds, interest rate risk is controlled by predictions of long-term interest rate trends, by setting short dealing interest rates prior to the beginning of business each day, and by establishing add-or-subtract authorization for personnel at different levels. In the management of foreign currency funds, trading position quotas are set for different currencies and for bank-wide foreign exchange positions, and stop loss limits are set for positions held for trading purposes and for non-hedging unleveled net positions for derivative products.

3. Interest rate and liquidity risk management

- (a) BOT has set up an Assets and Liabilities Management Committee to strengthen the structure of assets and liabilities. Under the leadership of the president, the Committee is divided into Management, Finance, and Capital subcommittees; and this Committee is responsible for setting guidelines for assets and liabilities management, liquidity position management, management of interest rate risk, and the review of the deposit and loan structure.

(b) Setting up management policy for liquidity and interest rate risk; setting up guidelines for liquidity risk management.

- a) Management of interest-rate sensitivity gap: The ratio of New Taiwan Dollar interest-rate-sensitive assets to liabilities shall fall between 80% and 140%. The ratio of New Taiwan Dollar capital gap to owner's equity shall be maintained between positive/negative 100%. The different positions in the foreign currencies resulting from changes in the interest rate shall not exceed total assets in each currency by 35%.
- b) Management of liquidity risk
 - a. Maintaining liquidity ratio: According to the Central Bank's "Liquidity Guidelines for Financial Institutions," Bank of Taiwan shall maintain a liquidity ratio for all deposits of over 10%.
 - b. Short-term gap analysis: 1~10-day and 11~30-day gaps are calculated; the period gap is greater than zero.
 - c. Foreign currency gap management: The ratio of accumulated capital liquidity gap for one month and for one year to total assets of the four major foreign currencies of Bank of Taiwan (U.S. Dollar, HK Dollar, JP Yen and Euro) should not exceed 50% and 40%, respectively.
 - d. Capital management: Full use is made of the Assets and Liabilities Management Information System on a regular basis to analyze maturity gaps of assets and liabilities and changes in maturity structure. The appropriate allocation and utilization of funds, and the adjustment of the capital structure are carried out in accordance with the capital situation. In the management of New Taiwan Dollar funds, in addition to maintaining an appropriate level of cash on hand and of securities that can be converted quickly into cash, the Bank has set policies for the reporting of New Taiwan Dollar funds to provide for the timely reporting of

receipts or disbursements of large amounts of funds. The Bank also carries out gap analysis of the maturity amount of purchased bills, bonds, and call loans so as to lower liquidity risk. In the management of foreign currencies, the Bank uses the maturity method to carry out funds gap analysis of the actual funds to be received or paid out within the next year.

4. The policy of reduction of credit risk in terms of pledges and guarantees

In its consideration of credit control and business promotion, BOT attempts to decrease the burden of credit risk by increasing collateral or strengthening the guarantee, based on BOT's credit and pledge policy. Collateral and guarantees include mortgages on real estate or property (i.e., land, building, machinery, car, ship, aircraft, etc.), pledges of securities or other rights (i.e., certificates of deposit; various bonds, stocks, or other securities), guarantees provided by government agencies, banks, or credit guarantee institutions authorized by the government, and any other guarantee or collateral approved by BOT.

3) BTLI

BTLI manages all risk arising from the related operation including market risk, insurance risk and process risk. The main principle of risk management should use the RBC to supervise each risk based on BTLI's business scale, market risk, insurance risk and process risk. BTLI should also set up a systems approach for risk assessment and monitoring in order to assess, supervise and manage each risk.

BTLI effectively identifies, assesses, monitors and manages the risk of each business based upon the nature of the business and matters arising from risk. In order to achieve risk management and reasonable earnings, BTLI controls the risk within its tolerance. The board of directors, being the highest decision-making unit, is responsible for managing overall risk. And the Risk Management Committee is responsible for executing all risk management policies approved by the board of directors and coordinating cross-department risk management matters.

4) BTS

For the requirements of business, BTS has set up an overall risk management system to effectively control all kinds of risk. The system can assure the achievement of BTS's long-term and steady management, profit growth, and strategy. At the same time, it formed a department with sole responsibility for risk control under the secretary unit of the risk management committee to handle these affairs and to exercise authority independently except over the operating unit and trade activities. The formation of the risk management organization by BTS includes the board of directors, the risk management committee, the administrative office, and all business units to execute the risk management decisions made by the board of directors and coordinate the related risk management matters across departments.

All risks of the business on or off the balance sheet should be subsumed under risk management, including market risk, credit risk, liquidity risk, operating risk, and other risk (for example legal risk, strategy risk, and reputation risk).

The related management systems of all kinds of risk are as follows:

1. BTS should effectively identify, measure, supervise, and control all risks when engaging in business. BTS should control the risk to a tolerable degree to reach the target of risk management and compensation rationalization.
2. Establish a risk indicator and warning system to implement the appropriate risk monitoring.
3. Establish a communication system. The complete risk information should be periodically given to senior management, conveyed to subordinates, and communicated across departments, and be available to the public according to the regulations.
4. Before developing new business or merchandise, changing the operating procedure, or developing the information system or operation, BTS should estimate the risk in advance and prepare the appropriate operating procedure and control method for the related risk.
5. Educate the professional risk management staff and provide education and training in risk management to the personnel of the operating unit to strengthen BTS's risk management culture.

(33) Related-Party Transactions

1) Name of related party and relationship

Name of related-party	Relationship with the Company
Land Bank of Taiwan Co., Ltd.	Affiliate (which was no longer a related party as of December 20, 2008)
Hua Nan Financial Holdings Co., Ltd.	Investee company of BOT under the equity method
Taiwan Life Insurance Co., Ltd.	Investee company of BOT under the equity method
Tang-Eng Iron Works Co., Ltd.	Investee company of BOT under the equity method
Kaohsiung Ammonium Sulfate Co., Ltd.	Investee company of BOT under the equity method
Tai Yi Real-Estate Management Co., Ltd.	Investee company of BOT under the equity method
Directors, supervisors, managers, and vice-managers	The Company's main management
Other related parties	The relatives of main management

2) Significant related-party transactions

1. Placement with banks

December 31, 2008

Note 1: Taiwan High Speed Rail Corporation is included.

- This form discloses total amounts which reach the lower of 5% of net worth or \$3 billion with respect to credit extensions, endorsements, or other transactions undertaken by a financial holding company and its subsidiaries for the same individual, the same related individual, or the same affiliated enterprises.
- Credit extensions mean loans, discounts, overdrafts, acceptances, guarantees, and other business items designated by the central competent authority-in-charge.
- Endorsements mean endorsements and guarantees of bills corporations.

5. Other transactions mean the following transactions with the same individual, the same related individual, or the same affiliated enterprises:

- (1) Invest or purchase securities whose issuers are these related parties.
- (2) Purchase these related parties' real estate or other assets.
- (3) Sell securities, real estate, or other assets to these related parties.
- (4) Sign contracts to give money or supply labor.
- (5) Act as an agent or broker of the financial holding company or its subsidiaries, or supply services on a commission or expenses basis.
- (6) Conducting the above transactions with third parties that are stakeholders in these related parties, or transactions in which these related parties participate with third parties.
- (7) The amounts of negotiable certificates issued by a bank subsidiary are not included in the calculation.
- (8) The amounts of financial institutions' repurchase agreements are not included in the calculation.

6) The disclosures according to Statement of Financial Accounting Standards No 28:

1. Loan quality, concentration of credit risk, and policies on allowance for bad debts arising from loans and advances to customers

(a) Loan quality

Type / Item			December 31, 2008				
			Amount of overdue loans	Total amount of loans	Ratio	Allowance for bad debt	Coverage ratio
Enterprise	Secured		5,993,948	391,147,404	1.53%	2,620,426	43.72%
	Non-secured		4,912,250	1,042,827,253	0.47%	4,488,539	91.37%
Consumer finance	House mortgage		6,386,009	361,339,108	1.77%	2,378,736	37.25%
	Cash card		-	-	-	-	-
	Micro credit		436,734	17,820,177	2.45%	396,861	90.87%
	Others	Secured	1,052,522	58,142,221	1.81%	424,656	40.35%
		Non-secured	2,476,296	128,466,677	1.93%	1,363,376	55.06%
Total			21,257,759	1,999,742,840	1.06%	11,672,594	54.91%
			Overdue receivables	Account receivable	Ratio	Allowance bad debt	Cover ratio
Credit card business			8,693	1,158,361	0.75%	14,606	168.02%
Factoring receivables-non-recourse			-	1,298,819	-	3,896	-

Note 1: For loan business: Overdue loans represent the amounts of reported overdue loans pursuant to the "Regulations Governing the Procedures for Banking Institutions to Evaluate Assets and Deal with Non-performing/Non-accrual Loans" issued by the MOF. For credit card business: Overdue receivables are regulated by the Banking Bureau letter dated July 6, 2005 (Ref. No. 0944000378).

Note 2: For loan business: NPL Ratio = NPL/Total Loans. For credit card business: Delinquency Ratio = Overdue receivables/Accounts receivable.

Note 3: For loan business: Coverage Ratio = LLR/NPL. For credit card business: Coverage Ratio = Allowance for credit losses/Overdue receivables.

Note 4: Household mortgage means the purpose of financing is to purchase, build, or fix up a dwelling, and the dwelling owned by the borrower, spouse, or children fully secures the loan.

Note 5: Micro credit is regulated by the Banking Bureau letter dated December 19, 2005 (Ref. No. 09440010950)

Note 6: Others in consumer finance refer to secured or non-secured loans excluding mortgage, cash card, micro credit, and credit card.

Note 7: Account receivables-factoring with no recourse: As required by the Banking Bureau letter dated July 19, 2005 (Ref. No. 094000494), provision for bad debt is recognized once no compensation is received from the factoring or insurance company.

(b) Concentration of credit extensions

Unit: Million, %

December 31, 2008			
Rank	Group Name	Credit extensions balance	% of net asset value
1	Formosa Plastics	45,311	20.03%
2	Chimei	36,995	16.36%
3	China Steel	31,672	14.00%
4	Evergreen	21,687	9.59%
5	BenQ	19,683	8.70%
6	Uni-President	15,518	6.86%
7	Promos Technologies	12,189	5.39%
8	Tainan Spinning	11,058	4.89%
9	Yuanta Financial Holdings	11,069	4.73%
10	China Airlines	9,922	4.39%

Note 1: Top ten borrowers (excluding government or state-owned utilities) according to total credit extensions.

Note 2: Groups are regulated in the Supplementary Provisions to the Taiwan Stock Exchange Corporation Criteria for Review of Securities Listings, Article 6.

Note 3: Total credit extensions comprise loans (including import bills negotiated, export bills negotiated, overdrafts, short-term loans, short-term secured loans, receivables from pecuniary finance, medium-term loans, medium-term secured loans, long-term loans, long-term secured loans, and overdue receivables), exchange bills negotiated, factoring receivable without recourse, acceptances receivable, and guarantees issued.

2. Information on concentration of credit risk of assets, liabilities, and off-balance-sheet items: Please see note 32.

3. The average amount of assets and liabilities, as well as the current rate, is disclosed as follows:

Subsidiary-BOT

	December 31, 2008	
	Average	Average interest rate (%)
Interest-earnings assets:		
Call loans and placement with banks	\$ 158,137,960	2.28
Placement with Central Bank	640,658,855	2.02
Financial assets	187,821,011	3.25
Negotiation, discounts and total loans	1,974,798,106	3.12
Interest-bearing liabilities:		
Deposit of Central Bank	12,984,027	-
Deposits and call loans from banks	217,817,458	2.07
Demand deposit	179,240,450	0.54
Demand savings	378,091,857	1.36
Time savings	1,338,061,939	3.13
Time deposits	536,787,854	2.98
Government deposits	230,896,009	0.81

Note: Average is calculated by daily average of interest-earning assets and interest-bearing liabilities from January to current month.

4. Ratios of interest-rate-sensitive assets to liabilities and of interest-rate-sensitive spread to net equity

Balance sheet interest rate sensitivity-for NTD

December 31, 2008

Subsidiary-BOT

Unit: Thousand NTD, %

	1~90 days	91~180 days	181 days to one year	Over one year	Total
Interest-rate-sensitive assets	\$ 1,355,929,976	1,210,165,619	96,956,678	-	2,663,052,273
Interest-rate-sensitive liabilities	343,727,421	2,023,111,444	350,447,148	-	2,717,286,013
Interest rate sensitivity gap	1,012,202,555	(812,945,825)	(253,490,470)	-	(54,233,740)
Net worth					230,669,037
Ratio of interest-rate-sensitive assets to liabilities					98.00
Ratio of interest rate sensitivity gap to net worth					(23.51)

Note 1: The above amounts include only New Taiwan Dollar amounts held by the Bank subsidiary's onshore branches (i.e., excluding foreign currency).

Note 2: Interest-rate-sensitive assets and liabilities refer to the revenues or costs of interest-earning assets and interest-bearing liabilities which are affected by interest rate changes.

Note 3: Interest rate sensitivity gap = Interest-rate-sensitive assets - Interest-rate-sensitive liabilities.

Note 4: Ratio of interest-rate-sensitive assets to liabilities = Interest-rate-sensitive assets/Interest-rate-sensitive liabilities (only interest-rate-sensitive assets and liabilities within one year, in New Taiwan Dollars).

Note 5: Ratio of interest rate sensitivity gap to net value = Interest rate sensitivity gap / net value.

Balance sheet interest rate sensitivity-for USD

December 31, 2008

Subsidiary-BOT

Unit: Thousand USD, %

	1~90 days	91~180 days	181 days to one year	Over one year	Total
Interest-rate-sensitive assets	\$ 11,447,791	1,914,005	1,277,147	895,286	15,534,229
Interest-rate-sensitive liabilities	11,136,518	2,873,090	1,547,171	130,058	15,686,837
Interest rate sensitivity gap	311,273	(959,085)	(270,024)	765,228	(152,608)
Net worth					(154,569)
Ratio of interest-rate-sensitive assets to liabilities					99.03
Ratio of interest rate sensitivity gap to net worth					98.73

Note 1: The above amounts include only U.S. Dollar amounts held by the onshore branches, OBU, and offshore branches of the Bank and exclude contingent assets and contingent liabilities.

Note 2: Interest-rate-sensitive assets and liabilities refer to the revenues or costs of interest-earning assets and interest-bearing liabilities which are affected by interest rate changes.

Note 3: Interest rate sensitivity gap = Interest-rate-sensitive assets - Interest-rate-sensitive liabilities.

Note 4: Ratio of interest-rate-sensitive assets to liabilities = Interest-rate sensitive assets/Interest-rate-sensitive liabilities (only interest-rate-sensitive assets and liabilities within 180 days, in U.S. Dollars).

Note 5: Ratio of interest rate sensitivity gap to net value = interest rate sensitivity gap / net value.

5. Profitability

Unit: %

Item	December 31, 2008
Return on total assets	Before income tax
	0.19
	After income tax
	0.19
Return on net worth	Before income tax
	3.10
	After income tax
	3.15
Profit margin	11.70

Note 1: Return on total assets = Income before (after) income tax/Average total assets.

Note 2: Return on net worth = Income before (after) income tax/Average net worth.

Note 3: Profit margin = Income after income tax/Total operating revenues.

Note 4: Income before (after) income tax is the income in the six months ended June 30, 2008.

6. Major foreign currency position, net

Subsidiary-BOT

December 31, 2008		
Currency	Amount in functional currency	Amount in New Taiwan Dollars
JPY	3,041,756	1,102,637
USD	27,363	896,795
GBP	18,676	883,732
CNY	112,184	538,023
SGD	14,718	335,141

Note 1: The major foreign currencies are the top five amounts after all functional currencies are converted to New Taiwan Dollars.

Note 2: The major foreign currency net position is the absolute value of each foreign currency net position.

7. Duration analysis of assets and liabilities

Term Structure Analysis of NTD-denominated Assets and Liabilities

December 31, 2008

Subsidiary-BOT

Unit: Thousand NTD

	Total	Amount for each remaining period to maturity				
		Day 1 to day 30	Day 31 to day 90	Day 91 to day 180	Day 181 to 1 year	Over 1 year
Main capital inflow on maturity	\$3,283,298,908	559,060,939	519,085,732	413,278,448	348,120,707	1,443,753,082
Main capital outflow on maturity	3,611,239,759	410,912,286	411,965,424	424,200,921	937,159,046	1,427,002,082
Interval gap	(327,940,851)	148,148,653	107,120,308	(10,922,473)	(589,038,339)	16,751,000

Note: The table includes only assets and liabilities denominated in NTD held in head office and domestic and overseas branches; assets and liabilities denominated in foreign currencies are excluded.

Term Structure Analysis of USD-denominated Assets and Liabilities

December 31, 2008

Subsidiary-BOT

Unit: Thousand USD

	Total	Amount for each remaining period to maturity				
		Day 1 to day 30	Day 31 to day 90	Day 91 to day 180	Day 181 to 1 year	Over 1 year
Main capital inflow on maturity	\$ 12,374,295	4,817,199	3,640,140	1,491,537	1,327,151	1,098,268
Main capital outflow on maturity	12,342,139	5,845,428	3,288,559	1,369,376	1,540,068	298,708
Interval gap	32,156	(1,028,229)	351,581	122,161	(212,917)	799,560

Note 1: The above amounts are book values of the assets and liabilities of the onshore branches and offshore banking unit of the subsidiary BOT in U.S. dollars, without off-balance-sheet amounts (for example, the issuance of negotiable certificates of deposits, bonds or stocks).

Note 2: If the overseas assets are at least 10% of the total assets, there should be additional disclosures.

8. The trade information about stakeholders who are borrowers, guarantors or collateral providers

(a) Name and relationship of the related party: Please see note 34. The credit part shows the stakeholders in accordance with "The Banking Act of the Republic of China", Article 33-1.

(b) Significant transactions with related party:

a) Loans: Please see note 34(2)(9)

b) Guarantee payment: none.

c) Transactions involving derivative financial instruments: none.

d) Transactions involving selling non-performing loans: none.

7) Financial information classified by business type

The year ended December 31, 2008

Unit: thousand NTD

Items	Businesses	Banking business	Insurance business	Securities business	Other business	Total
Net interest income		24,065,869	3,806,916	85,530	15	27,958,330

9. Information on regarding receivables from related parties for which the amount exceeded NT\$300 million or 10% of the Consolidated Companies' paid-in capital: none.

10. Information regarding trading in derivative financial instruments: please see note 33.

11. Information regarding selling non-performing loans for which the amount exceeded \$5 billion:

(a) The details of selling non-performing loans

Subsidiary-BOT

Transaction date	Transaction party	Details of non-performing loan	Book value	Selling price	Disposal gain/loss	Other	Relationship
2007.07.19 (Note)	A	(1) Working capital loan (2) Capital expenditure loan	14,335	282,263	267,928	none	none

Note: This transaction was completed on January 8, 2008.

(b) Detailed information on selling non-performing loans for which the amount exceeded \$1 billion under one transaction (excluding sales to related party): none.

12. The type of and related information on securitized instruments which were authorized to be engaged in according to the "Financial Asset Securitization Act" or the "Real Estate Securitization Act": none.

13. Other material transaction items which were significant to people who use the information in the financial statements: none.

3) Information on subsidiaries' investment in China: none.

(39) Segment Information: Please see note 36.

5. Cash flow difficulties at TFH and its affiliates: None.

1. Financial status

See page 46 of TFH's Condensed Balance Sheet.

2. Business results

See page 46 of TFH's Condensed Income Statement.

3. Cash flows

(1) Analysis of cash flow changes over the most recent fiscal year.

Item	2008
Cash flow ratio	-5.38 %
Cash flow adequacy ratio	-461.99 %
Cash flow reinvestment ratio	460.66 %

Note: The cash flow ratio and cash flow adequacy ratio were both negative because the company was established on 1st January 2008 and its subsidiaries have not yet paid out cash dividends, which caused net cash flow from operating activities to be negative.

(2) Cash liquidity in the coming year

Unit: NT\$1,000

Beginning cash	Net cash flow from operating activities for entire year	Net cash outflows for entire year	Cash surplus (or deficit)	Measures to make up for cash deficit	
				Investment plan	Financing plan
348,555	3,081,648	3,253,665	176,538	—	—

Note: Analysis of cash flow changes in current year

- Operating activities: Mainly net cash inflows generated by investment income.
- Investment activities: TFH will increase BTLI's capital by NT\$2 billion in 2009.
- Financing activities: TFH will issue debt to increase capital at its subsidiaries.

4. Impact of material capital expenditures in the most recent fiscal year on the company's financial status.

(1) Description of material capital expenditures, and source of capital

TFH has obtained financing and used it to increase its investment in subsidiary BTLI by NT\$2 billion.

(2) Expected benefits

This will improve the financial structure of BTLI and improve its operating results.

5. Policy on investment subsidiaries during the most recent fiscal year, main reasons for subsidiary profits or losses, corrective action plans, and investment plans for the coming year

(1) Equity investment policy in the most recent fiscal year

- (i) In coordination with government policy, we actively formulated plans for business expansion and sought to add securities investment trust and advisory services, asset management services, venture capital services, and other related lines of business to our corporate group, whether through M&A or by establishing new companies from scratch. Our aim is to create greater economies of scope.
- (ii) We aggressively sought out appropriate M&A targets in the banking, insurance, and securities industries in order to create greater economies of scale within the group.
- (iii) We adopted a three-pronged approach to making the company more international. The first approach calls for cooperation with the world's leading financial holding companies; the second approach involves bringing in independent directors of foreign nationality; and the third approach is to establish strategic partnerships with foreign entities. Within this framework, we will introduce modern managerial techniques and work to firm up our business.

(2) Main reasons for subsidiary profits or losses, and corrective action plans

Most of TFH's profits in 2008 were contributed by the Bank of Taiwan because the group's life insurance and securities subsidiaries were still in the startup phase and our insurance subsidiary, in particular, posted a loss after taking huge asset writedowns triggered by the US subprime mortgage crisis. In the future, TFH will work with its subsidiaries on steps to improve profitability. We intend to integrate group resources and step up our cross-selling, taking advantage of the strength afforded by our banking subsidiary's considerable assets, huge customer base, and highly developed channels to tap more fully into group synergies and achieve stable profitability over the long haul.

(iii) Investment plans for the coming year

In 2009 the group will continue following the set development strategy. We intend to carefully evaluate and select suitable targets for M&A deals or strategic alliances to strengthen the group more quickly and become more competitive.

6. Risk management

(1) Risk management organizational structure and policy

(i) Risk management organizational structure

TFH's risk management organizational structure includes the Board of Directors, the Risk Management Committee, the Department of Risk Management, and the subsidiaries. The responsibilities of each are as follows:

- (a) The Board of Directors is TFH's highest risk management unit, and bears ultimate responsibility for the overall level of risk borne by the group.
- (b) The Risk Management Committee reports to the Board of Directors, implements the risk management decisions adopted by the Board, and acts as a liaison between group members on risk management matters.
- (c) The Department of Risk Management is an independent risk management unit. It is in overall charge of all risk management matters, monitors the implementation of risk management decisions and directives adopted by the Board of Directors and the Risk Management Committee, and reports to them on the findings of its monitoring operations.
- (d) Each group subsidiary identifies, assesses, and controls the risks associated with its business operations and any new lines of business or new types of products, and adopts risk management bylaws, which it implements and reviews in order to meet the requirements of the Department of Risk Management.
- (e) The Department of Risk Management at TFH and each of its subsidiaries reports regularly to the Board of Directors on the status of risk management in the areas it is responsible for, so that we can be aware of whether our risks are within acceptable bounds.

(ii) Risk management policy

To strictly implement legal compliance and spur sound business practices throughout the group, TFH and its subsidiaries are paying close attention to the full range of risks, both on and off the balance sheet, including credit risk, market risk, operational risk, interest rate risk in the banking book, liquidity risk, country risk, and legal risk. In addition to complying with the requirements of the competent authority, each company in the group has also adopted risk management bylaws and procedures appropriate for the nature and size of its business.

**(2) New corporate image for TFH and its subsidiaries**

TFH was established by the Bank of Taiwan in a share swap as the result of a policy decision made by the Executive Yuan and the Ministry of Finance. As Taiwan's first wholly state owned financial holding company, the company is in an excellent position to facilitate economic development and stabilize the financial industry. The holding company's establishment creates a platform for cross-selling among its subsidiaries, development of a diverse range of services, integration of resources, reduction of costs, and achievement of enhanced competitiveness.

In order to build up the "Taiwan Financial Holdings" brand image, TFH has developed a customer-centered business model and is working with its subsidiaries to help strengthen business performance. Though 2008 was only its first year in business, the group nevertheless won numerous awards in recognition of its excellence. Our banking subsidiary won an award from the Financial Supervisory Commission as the No.1 provider among domestic banks of loans to small and medium enterprises from July 2007 through June 2008. And for our efforts to launch new products and simplify operations, we were granted an award for excellence by the Taiwan Academy of Banking and Finance, while the Bankers Association recognized us the No.1 processor of online bill and tax payment transactions and the No.4 source of transaction payments made via the National Payments Net in 2008. In the meantime, we earned ISO27001:2005 certification for our information security management system from the British Standards Institution (BSI). It is thus clear that the changeover to the holding company has helped make group members more competitive.

(3) Risks associated with concentration of business, and response measures

To avoid allowing our business to become overly concentrated, TFH's banking subsidiary has set limits on the percentage of loans and investments that can go to any particular type of customer or economic sector, or to affiliated enterprises. TFH has a detailed and comprehensive integrated risk control system to exercise rigorous monitoring and control over the degree of concentration of large risk exposures to any single party, single group of related parties, or single group of related enterprises.

(4) What is the effect upon and risk to the company in the event a major quantity of shares belonging to a director, supervisor, or shareholder holding greater than a 1 percent stake in the company has been transferred or has otherwise changed hands? What response measures are being or will be taken?

None (TFH is a state-run enterprise wholly owned by the government, with its shares owned by the Ministry of Finance. All our directors and supervisors are the Ministry's juristic-person representatives.)

(5) What is the effect upon and risk to company associated with any change in governance personnel or top management? What response measures are being or will be taken?

None (TFH is a state-run enterprise wholly owned by the government, with its shares owned by the Ministry of Finance. There has been no change in top management.)

(6) Have there been any litigious or non-litigious matters?

None.

7. Crisis management mechanism

The philosophy of our crisis management system is to prevent crises before they occur, or to handle them as quickly as possible once they do. In order to implement this system, TFH has adopted response plans to deal with a variety of different types of crises and emergencies, and has established an Emergency Response Team with a spokesman. When an incident occurs, a groupwide notification and response system kicks in, and designated people take the lead in organizing and implementing a response.

SOWING THE SEEDS OF A
Bountiful Harvest
Focus on the essentials, build up strength

VIII. Matters of special note	126
1. TFH affiliates	126
2. In 2008, or in the current year as of the date of printing of this annual report, has TFH conducted any private placement of securities	126
3. In 2008, or in the current year as of the date of printing of this annual report, has any subsidiary held or disposed of TFH stock	126
4. Overseas branch units of the Bank of Taiwan	127

VIII. Matters of special note

1. TFH affiliates

(i) Organizational charts for TFH affiliates: See page 15, "Chart of Relations Within the TFH Group" under "III. Corporate Governance Report."

(ii) Basic data on TFH affiliates

Name	Date founded	Address	Paid-in capital	Main businesses or products
Bank of Taiwan	20 May 1946	No.120, Chongcing South Road Section 1, Taipei	NT\$45 billion	Banking
BankTaiwan Life Insurance	2 Jan. 2008	Fls. 1 & 3-8, No.69, Dunhua South Road Section 2, Taipei	NT\$5 billion	Life insurance
BankTaiwan Securities	2 Jan. 2008	No.58, Chongcing South Road, Taipei	NT\$3 billion	Securities

(iii) Among these three affiliates, is there presumed to be a relationship of control and subordination as defined in Article 369-3 of the Company Act?

No

(iv) What types of business are conducted by TFH affiliates?

Banking, insurance, and securities

2. In 2008, or in the current year as of the date of printing of this annual report, has TFH conducted any private placement of securities?

No

3. In 2008, or in the current year as of the date of printing of this annual report, has any subsidiary held or disposed of TFH stock?

No
